

this need, as well as providing an attractive option for utilization of wood products from forest management projects and associated economic benefits.

5. To maintain adequate snow coverage in specific high-traffic areas. Early-season snow coverage is often inadequate on several key trails on the central part of the ski mountain. Improved snow coverage is needed to alleviate these deficiencies. The proposed expansion of the existing snowmaking system addresses this need.

6. To provide additional summer recreational opportunities. The resort currently has only one dedicated hiking trail and one mountain bike trail, located in the base and Nordic areas. Increased hiking and biking infrastructure is needed to meet demand, increase year-round utilization of resort resources and infrastructure, and to provide downhill mountain biking opportunities on the Forest. The proposed hiking trails, mountain bike park, interpretive areas, zipline course, and rock climbing structure address this need.

*Proposed Action.* The Proposed Action can be summarized as follows:

*Eastside Pod:*

- Developing the new Eastside Express chairlift and associated trails. The lift would be a detachable-grip, quadruple lift about 6,800 feet long with a capacity of 2,400 persons per hour (pph).

- Constructing a new catchline at a lower elevation and selective thinning above the new catchline.

*Sunrise Area:*

- Replacing the Rainbow lift in a shortened alignment. The alignment would be shortened by about 40 percent to 3,150 feet. The current Sunshine Express lift, a detachable quad with a capacity of 1,800 pph, would replace the existing fixed-grip lift.

- Replacing the Sunshine Express lift, a detachable quad rated at 1,800 pph, with a new detachable six-place lift with a capacity of 2,800 pph.

- Developing the Sunrise Learning Center, the venue for the resort's children's ski school program, that would include dedicated space in the remodeled Sunrise Lodge, carpet lifts on adjacent "bunny hills," and a forested kids "adventure zone."

- Improving Sunrise base area skier services, including a new 18,000 to 25,000 square foot lodge and a 115 percent expansion of the parking lot with a new access road.

- Constructing a 125,000-gallon buried water reservoir to provide

adequate storage for the new lodge and associated facilities.

- Doubling the capacity of the existing Sunrise base area wastewater treatment system, particularly the drain field.
- Installing a restroom facility near the base of Skyliner Express.

*West Village Area:*

- Shortening the Red Chair by roughly 25 percent to 3,000 feet, and constructing the Alpine Training Center to house the resort's alpine racing program.

- Adding 25.4 acres to the resort's snowmaking coverage by expanding the existing snowmaking system onto five adjacent ski trails.

- Removing outdated West Village buildings (the ski patrol/administration building and the generator building) and expanding the West Village Lodge by about 7,000 square feet.

- Moving the tubing hill across the parking lot to the "Old Maid" area.

- Developing a new 2.5-acre employee/overflow parking lot.

- Constructing a biomass co-generation facility to provide electrical power and steam heat. It would be located near the existing maintenance building and fuel storage area.

*Nordic Center:*

- Making minor improvements to the Nordic Center infrastructure, including a 2-acre learning area, two new trails to access the existing trail network, and refurbishing Bob's Bungalow, including a new deck and fire pit.

*Summer Activities:*

- New hiking trails from Pine Marten Lodge to West Village, from the lodge to the top of Northwest Express lift, and around an interpretive loop above the lodge.

- A mountain bike park including a skills area near the base of Pine Marten Express lift and a series of beginner, intermediate, and advanced downhill trails accessed from the top of the lift.

- A canopy tour zipline course with three segments from Pine Marten Lodge down to West Village.

- A rock climbing structure at Pine Marten Lodge.

*Issues.* Preliminary issues include the effect of the Proposed Action on potential wilderness (the Eastside pod would be adjacent to an inventoried roadless area), special status plant and wildlife species including the northern spotted owl and several fungi, and visual quality, particularly as viewed from the Cascade Lakes Scenic Byway.

*Additional Opportunities for Public Involvement.* A Draft EIS will be filed with the Environmental Protection Agency (EPA) and is projected to be released for public review in March

2012. The EPA will publish a Notice of Availability (NOA) of the Draft EIS in the **Federal Register**, opening a 45-day period for comment on that document; the DNF will then publish a legal notice in the newspaper of record, The Bulletin in Bend, OR, announcing the date of the **Federal Register** notice.

The Final EIS and Record of Decision (ROD) are scheduled to be released in February 2013. The ROD will include responses to all substantive comments received on the Draft EIS. The EPA will publish a Notice of Availability (NOA) of the Final EIS in the **Federal Register**, and the DNF will publish a legal notice in the newspaper of record, opening a 45-day period for administrative appeal of the decision documented in the ROD (36 CFR part 215).

Dated: April 18, 2011.
