SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

The Agency received no comments in response to the 60-day notice published in the Federal Register of December 22, 2010 (75 FR 80542).

ACTION: Notice.

This notice announces an updated computation for assessments received by importer associations under the Hass Avocado Promotion, Research, and Information Order (Order)(7 CFR part 1219). The Order is authorized under the Hass Avocado Promotion, Research, and Information Act of 2000 (7 U.S.C. 7801–7813). The Order covers fresh domestic and imported Hass avocados and is administered by the Hass Avocado Board (Board). Under the program, assessments are paid by producers and importers and used for programs designed to increase the consumption of Hass avocados in the United States. A state association receives 85 percent of the assessment paid by all producers in the State of California and uses these funds to conduct state-of-origin promotions. Importer associations receive 85 percent of the assessments paid by their members and use these funds to conduct country-of-origin promotions. This notice announces that assessments from all Hass avocado importers who import Hass avocados from a country represented by an importer association will be included in the 85 percent assessment computation. For those importers of Hass avocados whose assessments were not previously included in the 85 percent calculation, such importers may have their assessments not included in the computation upon notice to the Board. Information regarding the updated computation is available from the Agricultural Marketing Service at http://www.ams.usda.gov/FVPromotion. The updated computation will become effective 60 days after the date of publication in the Federal Register.
