

should be used for assessing an interoperability tests' suitability for inclusion in the P25 CAP. The following criteria are provided as a basis for comment:

- For all information fields relevant to the feature under test, is a linearly independent set of values used across the entire allowable range?
- Is timing between subsequent packets identified related to transmission or reception of voice or message/alarm examined?
- Can functionality already be tested using other P25 CAP-recognized testing criteria?
- Does the interoperability test procedure address and test adverse responses due to configurations of parameter values outside the normal or permissible range?
- Does the test procedure accommodate evaluation of a test article's behavior where multiple defined responses are possible?
- If capable, does each unit under test perform the roles of both transmitter and receiver during the test?
- Does the test provide definitive predictive outcomes (behaviors) for all articles under test?

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for renewal of a currently approved information collection.

The Pacific Halibut and Sablefish Individual Fishing Quota (IFQ) Program was developed to reduce fishing capacity that had increased during years of management as an open access fishery, while maintaining the social and economic character of the fixed gear fishery that is relied on as a source of revenue for coastal communities in Alaska. The Halibut and Sablefish IFQ Program provides economic stability for the commercial hook-and-line fishery while reducing many of the conservation and management problems commonly associated with open access. The IFQ Program for sablefish and Pacific halibut fixed gear provides each fisherman a catch quota that can be used any time during the open season. Individual shares are intended to allow fishermen to set their own pace and adjust their fishing effort. The IFQ Program is intended to reduce the premium that was traditionally placed

on speed, allowing fishermen to pay more attention to efficiency and product quality. The IFQ Program consists of three parts: IFQ halibut and sablefish, Western Alaska Community Development Quota (CDQ) halibut, and Gulf of Alaska (GOA) IFQ community quota share. This action is a request for renewal for the collection-of-information.
