**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Mine Safety and Health Administration (MSHA) is responsible for the inspection, testing, approval and certification, and quality control of mining equipment and components, materials, instruments, and explosives used in both underground and surface coal, metal, and nonmetal mines. Title 30, Code of Federal Regulations (CFR), parts 6 through 36 contain procedures by which manufacturers may apply for and have equipment approved as "permissible" for use in mines.

**II. Desired Focus of Comments**

MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the documents supporting this information collection request can be obtained by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice, or viewed on the Internet at *http://www.msha.gov*. To view the documents

on MSHA's Web site: select "Rules & Regs" on the right side of the screen; then select "FR Docs"; and under "Information Collection Requests" on the next screen, select "Paperwork Reduction Act Supporting Statements."

**III. Current Actions**

This notice contains the request for an extension of the existing collection of information in 30 CFR Parts 6 through 36. Parts 6 through 36 require that an investigation leading to approval or certification will be undertaken by the A&CC at the MSHA only pursuant to a written application accompanied by prescribed drawings and specifications identifying the piece of equipment. This information is used by engineers and scientists to evaluate the design in conjunction with tests to assure conformance to standards prior to approval for use in mines.
