Agency Information Collection

Activities: BioWatch Filter Holder Log

AGENCY: Department of Homeland Security, DHS.

ACTION: 60-Day Notice and request for comments; Extension with change, 1601-0006.

SUMMARY: The Department of Homeland Security, DHS, will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35).

DATES: Comments are encouraged and will be accepted until July 1, 2011. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Written comments and questions about this Information Collection Request should be forwarded to DHS, DHS Attn.: Daniel Yereb, djy1@dhs.gov, 703-647-8052.

SUPPLEMENTARY INFORMATION: The Department of Homeland Security (DHS), Office of Health Affairs/OCMO Early Detection Division will collect information from BioWatch jurisdictions. The BioWatch Program operates aerosol collector equipment in approximately 30 U.S. jurisdictions to monitor for the presence of organisms that may be related to the deliberate release of a select subset of biological threat agents. Information is collected in writing by a representative of a BioWatch jurisdiction (either an employee, or a contractor) assigned responsibility for installing and removing filters from aerosol collection devices and transportation to local laboratories for sample analysis. A standard filter log form is completed for each sample and is archived by the BioWatch jurisdiction for a period of one year. The BioWatch Program reimburses participating jurisdictions for the cost of collection and laboratory analysis activities, including the preparation of the filter log form and other documentation. The creation of a written record for each sample is required to support law enforcement activities, including criminal

prosecution in the case of a deliberate release of a biological agent.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
