

reasonable alternatives to be addressed in the EA on the reissuance of the National Pollutant Discharge Elimination System (NPDES) general permit for stormwater discharges from construction activities that are greater than one acre. EPA invites the public to submit comments through Regulations.gov or by mail or fax to the address cited in the **ADDRESSES** section during the 30-day comment period following the publication of the Proposed Construction General Permit in the **Federal Register**.

Since 1992, EPA has issued a series of NPDES Construction General Permits (CGP) that cover areas where EPA is the permitting authority. At present, EPA is the permitting authority in four states (Idaho, Massachusetts, New Hampshire, and New Mexico), the District of Columbia, Puerto Rico, all U.S. territories with the exception of the Virgin Islands, federal facilities in four states (Colorado, Delaware, Vermont, and Washington), most Indian lands and a few other specifically designated activities in specific states (e.g., oil and gas activities in Texas and Oklahoma). EPA's current CGP became effective on June 30, 2008 (*see* 74 FR 40338) and will expire on June 30, 2011. (**Note:** On April 25, 2011, EPA proposed extending the expiration of the 2008 CGP until January 31, 2012. *See* 76 FR 22891.) On April 25, 2011, EPA proposed for public comment the draft National Pollutant Discharge Elimination System general permit for stormwater discharges from large and small construction activities. 76 FR 22882. The proposed permit would replace the 2008 CGP, as well as the 2003 CGP for construction sites still covered under that administratively continued permit. EPA proposes to issue the construction general permit for five (5) years, and to provide permit coverage to eligible existing and new construction projects in all areas of the country where EPA is the NPDES permitting authority.

EPA is currently planning to analyze two alternatives in the EA: No Action, that is not issuing the CGP; and the proposed action, which is issuing the draft CGP implementing the technology-based Effluent Limitation Guidelines and New Source Performance Standards (C&D Rule). The C&D Rule was issued by EPA for the construction and development industry on December 1, 2009. These requirements include (1) non-numeric effluent limitations that apply to all permitted discharges from construction sites in order to minimize the discharge of pollutants, and (2) a numeric effluent limit that applies to sites over 10 acres. The EA will analyze the potential environmental impacts of

both alternatives on threatened and endangered species, water quality, and historic properties.

*Needs and Uses:* The Commission  
will submit this information collection  
(IC) to the OMB during this comment  
period. The Commission is seeking  
OMB approval for revision of this  
information collection.

The Commission is requesting OMB  
approval for a revision because on  
August 7, 2008, the FCC released a  
*Third Report and Order* in PS Docket  
No. 07-287, FCC 08-184 (*CMAS Third  
R&O*).

The *CMAS Third R&O* implements  
provisions of the Warning, Alert and  
Response Network ("WARN") Act,  
including inter alia, a requirement that  
within 30 days of release of the *CMAS  
Third R&O*, each Commercial Mobile  
Service (CMS) provider must file an  
election with the Commission  
indicating whether or not it intends to  
transmit emergency alerts as part of the  
Commercial Mobile Alert System  
(CMAS). The *CMAS Third R&O* noted  
that this filing requirement was subject  
to OMB review and approval. The  
Commission received "pre-approval"  
from the OMB on February 4, 2008. The  
Commission began accepting CMAS  
election filings on or before  
September 8, 2008.

All CMS providers are required to  
submit a CMAS election, including  
those that were not licensed at the time  
of the initial filing deadline with the  
FCC. In addition, any CMS provider  
choosing to withdraw its election must

notify the Commission at least sixty (60) days prior to the withdrawal of its election. The information collected will be the CMS provider's contact information and its election, i.e., a "yes" or "no", on whether it intends to provide commercial mobile service alerts.

The Commission will use the information collected to meet its statutory requirement under the WARN Act to accept licensees' election filings and to establish an effective CMAS that will provide the public with effective mobile alerts in a manner that imposes minimal regulatory burdens on affected entities.

In an Order on Reconsideration (FCC 04-251), the Commission considered four petitions for reconsideration of the Commission's *Report and Order*. The *Report and Order* established detailed rules (Payphone Compensation Rules) ensuring that payphone service providers or PSPs are "fairly compensated" for each and every completed payphone-originated call pursuant to section 276 of the Communications Act as follows:

(1) The Payphone Compensation Rules place liability to compensate PSPs for payphone-originated calls on the facilities-based long distance carriers from whose switches such calls are completed.

(2) The Payphone Compensation Rules define these responsible carriers as "completing carriers" and require them to develop their own system of tracking calls to completion, the accuracy of which must be confirmed and attested to by a third-party auditor.

(3) Completing carriers must file with PSPs a quarterly report and must also submit an attestation by the chief financial officer (CFO) that the payment amount for that quarter is accurate and is based on 100% of all completed calls.

(4) The rules also require reporting obligations for other facilities-based long distance carriers in the call path, if any, and define these carriers as "intermediate carriers".

(5) Additionally, the rules give parties flexibility to agree to alternative compensation arrangements (ACA) so that small completing carriers may avoid the expense of instituting a tracking system and undergoing an audit.

(6) The Payphone Compensation Rules satisfy section 276 by identifying the party liable for compensation and establishing a mechanism for PSPs to be paid.

The information collected under the Completing Carrier filing of quarterly reports and Intermediate Carrier filing of quarterly reports must be provided to third parties. The information collected under the completing carrier establishment of call tracking system must be provided to third parties and submitted to the Commission. The information is collected annually under completing carrier establishment of call tracking system. Completing carrier
