Regulatory Flexibility Act Certification

I certify that the following action will
not have a significant impact on a
substantial number of small entities. The
major factors considered for this
certification were:

1. If approved, the action will not
result in any additional reporting,
recordkeeping or other compliance
requirements for small entities other
than the small organizations that will
provide the services to the Government.
2. If approved, the action will result
in authorizing small entities to provide
the services to the Government.
3. There are no known regulatory
alternatives which would accomplish
the objectives of the Javits-Wagner-
O’Day Act (41 U.S.C. 46–48c) in
connection with the services proposed
for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the
statement(s) underlying the certification
on which they are providing additional
information.

End of Certification

for addition to the Procurement List for
production by the nonprofit agencies
listed:

Attendant and Cook Support Service,
Army 7th Special Forces Group,
Building 4570, Eglin AFB, FL.

For this project, the DOD contracting

requirement is newly constructed and
will be under the control and military
management of the 7th Special Forces

Because the 7th Special Forces Group
has the ability to deploy, the project
may be deployed. During deployments,
cooking support will be provided to a
deployment group.

Because the 7th Special Forces Group
is a deployable, combat unit, it may be
absent from Eglin AFB as its mission
and training dictates. Support will be
required when troop strength is under
75% due to training/employment/
re-deployment. At a minimum, cook
support will augment 25% of the
required military manpower. The
military will retain management and
operational control during deployments
as a Government (civil service)
contracting officer’s representative will
assume those duties. At no time will the
AbilityOne nonprofit agency contractor
be responsible for the management and
operational control of the DFAC.
