SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled "Submission of Summary Bioequivalence Data for ANDAs." The guidance provides recommendations to applicants planning to include BE studies for submission in ANDAs. The guidance provides information on the following subjects:

- Types of ANDA submissions covered by the regulations on BE studies;
- Recommended format for summary reports of BE studies; and
- Types of formulations the Agency considers to be the same drug product formulation for different dosage forms based on differences in composition.

The guidance is applicable to BE studies conducted for ANDAs during both preapproval and postapproval periods.

On April 17, 2009, FDA announced the availability of the draft version of this guidance (74 FR 17872). The public comment period closed on July 16, 2009. A few comments were received from the public, all of which the Agency considered carefully as it finalized the guidance and made appropriate changes. Changes to the guidance were minor and made to clarify statements in the draft guidance.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the Agency's current thinking on submission of summary bioequivalence data for ANDAs. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.
