Title: Transition Program for Equipment Manufacturers (Renewal).

ICR numbers: EPA ICR No. 1826.05, OMB Control No. 2060-0369.

ICR Status: This ICR is scheduled to expire on May 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not

conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: When EPA establishes new regulations with tighter engine emission standards, engine manufacturers often need to change the design of their engines to achieve the required emissions reductions. Consequently, original equipment manufacturers (OEMs) may also need to redesign their products to accommodate these engine design changes. Sometimes, OEMs have trouble making the necessary adjustments by the effective date of the regulations. In an effort to provide OEMs with some flexibility in complying with the regulations, EPA created the Transition Program for Equipment Manufacturers (TPERM). Under this program, OEMs are allowed to delay compliance with the new standards for up to seven years as long as they comply with certain limitations. Participation in the program is voluntary. Participating OEMs and engine manufacturers who provide the noncompliant engines are required to keep records and submit reports of their activities under the program.

The information is collected for compliance purposes by the Engine Programs Group, Certification and Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation. Confidentiality of proprietary information is granted in accordance with the Freedom of Information Act, EPA regulations at 40 CFR 2, and class determinations issued by EPA's Office of General Counsel.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 51 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the

existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by these actions are manufacturers of compression-ignition engines and equipment.

Estimated Number of Respondents: 405.

Frequency of Response: Annually and on occasion.

Estimated Total Annual Hour Burden: 40,090.

Estimated Total Annual Cost: \$4,086,455, includes \$1,061,650 O&M costs.

Changes in the Estimates: There is an increase of 31,543 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. Total burden has increased significantly due to a sharp increase in the estimated number of participants. Tighter Tier 4 standards have resulted in engine manufacturers not being able to provide their customers with compliant engines in time for the effective date of the new regulations. This has meant that equipment manufacturers who did not previously participate in TPEM now need the program to reach the gap between the effective date of the regulations and the date when compliant engines are ready. A significant number of participants will also be added when the small Si program starts in 2011. EPA expects at least 150 new participants from that industry alone.

Dated: May 12, 2011.

Director, Collection Strategies Division.
