The ETA sponsors the GJHC grant program for worker training and placement in high growth and emerging industries through training grants, including the Pathways Out of Poverty (POP) and Health Care and High Growth (HHG) grants.

The overall aim of this evaluation is to determine the extent to which enrollees achieve increases in employment, earnings, and career advancement because of their participation in the training provided by POP and HHG grantees and to identify promising best practices and strategies for replication. Individuals enrolling in the GJHC training programs have a 50/50 chance of receiving these services. Those individuals not receiving the training services receive the existing services offered by the grantee. Education, employment, and other outcomes of the two groups will be compared over time to evaluate the GJHC training grant impact. The evaluation will estimate the success in providing educational and occupational skills training that fosters entry into job fields that are innovative and/or experiencing high growth, as in health care industry.

Husqvarna Turf Care, a Subsidiary of Husqvarna A.B., Beatrice, NE; Notice of Affirmative Determination Regarding Application for Reconsideration

By application dated April 23, 2011, a petitioner requested administrative reconsideration of the negative determination regarding workers'

eligibility to apply for Trade Adjustment Assistance (TAA) applicable to workers and former workers of Husqvarna Turf Care, a subsidiary of Husqvarna A.B., Beatrice, Nebraska (subject firm). The negative determination was issued on March 23, 2011. The Department's Notice of Determination was published in the **Federal Register** on April 11, 2011 (76 FR 20048). The workers are engaged in activities related to the production of zero turn mowers for commercial users and home owners.

The negative determination was based on the findings that Criterion III has not been met because the worker separations are not attributable to increased imports or a shift in production to a foreign country. Rather, the investigation established that the worker separations were attributable to a shift in production to an affiliated facility within the United States, and that the shift is attributable to business considerations unrelated to increased imports.

With regard to the affiliated facility (TA-W-74,418), the worker separations were attributable to a shift by the workers' firm of computer-aided design (CAD) services to a foreign country. The investigation confirmed that the shift of CAD services was unrelated to the shift in production in this case.

With respect to Section 222(c) of the Act, the investigation revealed that Criterion (2) has not been met because the firm is not a Supplier or Downstream Producer to a firm that employed a worker group eligible to apply for TAA.

In the request for reconsideration, the petitioner stated that "it has been the intent of Husqvarna to gradually but progressively move these jobs to another country or countries * * * It has been rumored that he (a line leader) has been given the ultimatum to increase his production or they would move this line to Germany. In addition to this, it was rumored that they had built a new building in Germany * * * and that our PZ line was already running in Germany before our plant had closed." In an attachment to the request, another worker stated that "we have reports that some of our jobs have already been moved to foreign soil and that more will be in the future."

The Department has carefully reviewed the request for reconsideration and the existing record, and has determined that the Department will conduct further investigation to determine if the petitioning workers meet the eligibility requirements of the Trade Act of 1974, as amended.
