SUMMARY: On April 8, 2011, HUD posted the Notice of Funding Availability (NOFA) for the Fiscal Year (FY) 2011 Asthma Interventions in Public and Assisted Multifamily Housing Program to Grants.gov (FR-5500-N-06). The NOFA announced the availability of information on applicant eligibility, submission deadlines, funding criteria, and other requirements for HUD's FY 2011 Asthma Interventions in Public and Assisted Multifamily Housing Program. The posted NOFA indicated the total amount of funding available was subject to enactment of HUD appropriations.

Based on the enactment of the FY 2011 HUD appropriations, approximately \$2 million is available for the Asthma Interventions in Public and Assisted Multifamily Housing Program.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we complete the CCP process for Swan Lake NWR, which we began by publishing a notice of intent on (71 FR 20722, April 21, 2006). For more information about the initial process, see that notice. We released the draft CCP and EA to the public, announcing and requesting comments in a notice of availability (75 FR 30422) on June 1, 2010.

Swan Lake NWR was established in 1937 by Executive Order 7563 to serve as a refuge and breeding ground for migratory birds and other wildlife. The Refuge includes more than 11,000 acres and is also responsible for managing 57 easements and outlying fee-title tracts scattered across 15 counties in Missouri.

The Draft CCP and EA were officially released for public review on June 1, 2010, opening a 35-day comment period that ended on July 5, 2010. Planning information was sent to approximately 200 individuals, organizations, elected officials, and local, State, and Federal agencies, and an electronic copy of the Draft CCP and EA was made available on the Service's Web site. During the comment period, the Refuge also hosted an open house to receive public comments and feedback. An estimated 385 people attended the event and submitted more than 130 written comments. In total, more than 500 comments were received by the Service during the public review period. Based on comments received, a fourth alternative was developed, followed by another public comment period, which produced 50 additional comments and a number of minor changes to the fourth alternative.
