

included approval of the delegation of NESHAP Subpart RRRRRR and of any future amendments to Subpart RRRRRR. A copy of that letter is provided as follows:

“Ms. Joyce E. Epps, Director
Bureau of Air Quality
Pennsylvania Department of
Environmental Protection
Rachel Carson State Office Building
P.O. Box 8468
Harrisburg, PA 17105-8468

Dear Ms. Epps:

On January 5, 2011, the U.S. Environmental Protection Agency (EPA) delegated to Pennsylvania the authority to implement and enforce all of the additional National Emissions Standards for Hazardous Air Pollutants (NESHAP) for which Pennsylvania had requested delegation in a December 10, 2009 submittal. EPA granted this delegation pursuant to previously approved delegation mechanisms.

In EPA's January 5, 2011 approval EPA listed for reference the additional NESHAP for which Pennsylvania had requested delegation in its December 10, 2009 submittal. EPA has since noted that its listing was incomplete in that it did not include one of the NESHAP for which Pennsylvania had requested delegation, NESHAP Subpart RRRRRR for Clay Ceramics Manufacturing Area Sources.

This is to confirm that EPA's January 5, 2011 approval of Pennsylvania's December 10, 2009 request for delegation of authority to implement and enforce additional NESHAP also delegated to Pennsylvania the authority to implement and enforce NESHAP Subpart RRRRRR for Clay Ceramics Manufacturing Area Sources.

EPA appreciates Pennsylvania's continuing efforts to implement and enforce all delegated NESHAP. If you have any questions, please contact me at 814-2706 or Ray Chalmers of my staff at 215-814-2061.

Sincerely,

Diana Esher, Director
Air Protection Division”

This notice confirms EPA's delegation to Pennsylvania of the authority to implement and enforce additional NESHAP.

Dated: April 26, 2011.

Diana Esher,
Director, Air Protection Division, Region III.

SUPPLEMENTARY INFORMATION: This document may be useful to Federal, State or local risk assessors and managers, contractors, or other parties interested in conducting microbial risk assessments on land-applied biosolids. In particular, this document provides concepts and planning considerations for conducting human health risk assessments on potential pathogens in land-applied biosolids. The document does not represent guidance, nor does it constitute a risk assessment for pathogens in land-applied biosolids. As one component of U.S. EPA's action plan for its biosolids program (<http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=231964>), this document summarizes the existing literature; defines critical pathogen stressors; develops conceptual models linking the most likely stressors,

pathways and health responses of concern; evaluates the overall quality and utility of available risk assessment data; highlights existing tools and methodologies; and provides an outline of an Analysis Plan that identifies gaps in knowledge and research and methods needed to provide more scientifically defensible assessments relevant to U.S. EPA's decision needs. The document has been updated and revised by EPA based on comments received from the public and an independent, external panel of scientific experts (73 FR 54400).

Dated: May 18, 2011.

Acting Director, National Center for Environmental Assessment.
