BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2011-0120]

Notice of Issuance of Bulletin 2011-01, Mitigating Strategies

AGENCY: U.S. Nuclear Regulatory
 Commission.

ACTION: Notice of Issuance.

SUMMARY: The U.S. Nuclear Regulatory
 Commission (NRC) has issued Bulletin
 2011-01 to all holders of operating
 licenses for nuclear power reactors,
 except those who have permanently
 ceased operation and have certified that
 fuel has been removed from the reactor
 vessel. The NRC has issued this Bulletin
 to obtain a comprehensive verification
 of compliance with the regulatory
 requirements regarding the conditions
 of licenses.

DATES: The Bulletin was issued on May
 11, 2011.

ADDRESSES: NRC Bulletin 2011-01:
 "Mitigating Strategies" is available
 through the NRC's Agencywide
 Documents Access and Management
 System (ADAMS) under Accession
 Number: ML111250360.

- *NRC's Public Document Room (PDR):* The public may examine and have copied, for a fee, publicly available documents at the NRC's PDR, O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* Publicly available documents created or received at the NRC are available online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. From this page, the public can gain entry into ADAMS, which provides text and image files of the NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC's PDR reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdr.resource@nrc.gov.

FOR FURTHER INFORMATION CONTACT: Eric
 Bowman, Senior Project Manager,
 Generic Communications and Power
 Uprate Branch, Division of Policy and
 Rulemaking, Office of Nuclear Reactor
 Regulation, U.S. Nuclear Regulatory

Commission. *Telephone:* 301-415-2963;
e-mail: Eric.Bowman@nrc.gov.

SUPPLEMENTARY INFORMATION:

The NRC Has Issued This Bulletin for Three Purposes

1. To require that addressees provide
 a comprehensive verification of their
 compliance with the regulatory
 requirements of Title 10 of the *Code of
 Federal Regulations* (10 CFR)
 50.54(hh)(2),

2. To notify addressees about the NRC
 staff's need for information associated
 with licensee mitigating strategies under
 10 CFR 50.54(hh)(2) in light of the
 recent events at Japan's Fukushima
 Daiichi facility in order to determine if
 (1) Additional assessment of program
 implementation is needed, (2) the
 current inspection program should be
 enhanced, or (3) further regulatory
 action is warranted, and

3. To require that addressees provide
 a written response to the NRC in
 accordance with 10 CFR 50.54(f).

Dated at Rockville, Maryland, this 24th day
 of May 2011.

For the Nuclear Regulatory Commission.

Stacey Rosenberg,

*Chief, Generic Communications and Power
 Uprate Branch, Division of Policy and
 Rulemaking, Office of Nuclear Reactor
 Regulation.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-03754; NRC-2011-0033]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for ABB, Inc., Windsor, CT

AGENCY: U.S. Nuclear Regulatory
 Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: John
 Nicholson, Project Manager,
 Decommissioning Branch, Division of
 Nuclear Materials Safety, Region I, U.S.
 Nuclear Regulatory Commission, King
 of Prussia, Pennsylvania, 19406.
Telephone: 610-337-5236; *fax number:*
 610-337-5269; *e-mail:*
John.Nicholson@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory
 Commission (NRC) is issuing a license
 amendment to Material License No. 06-
 00217-06 issued to ABB, Inc. (ABB or,
 "the licensee"), to authorize a revision to

the previously approved (June 1, 2004)
 Decommissioning Plan (DP) for its CE
 Windsor Site (Facility) located at 2000
 Day Hill Road, Windsor, Connecticut.
 The NRC has prepared an
 Environmental Assessment (EA) in
 support of this amendment in
 accordance with the requirements of 10
 CFR Part 51. Based on the EA, the NRC
 has concluded that a Finding of No
 Significant Impact (FONSI) is
 appropriate. The amendment will be
 issued following the publication of this
 Notice.

II. EA Summary

Identification of Proposed Action

The purpose of the proposed
 amendment is to approve a revision,
 Decommissioning Plan Revision (DP) 2,
 to the previously approved site DP for
 the licensee's facility. The original DP
 was approved on June 1, 2004, and
 revision 1 was approved on July 8, 2009.
 Specifically, this Revision 2 to the
 approved DP expands the scope of the
 DP and provides the radiological status
 and remediation plans for select
 Formerly Utilized Sites Remedial
 Action Program (FUSRAP) areas,
 including the Site Brook and the
 adjacent Debris Pile. In addition, site-
 specific derived concentration guideline
 limits (DCGLs) for thorium-232 (Th-232)
 and radium-226 (Ra-226) are provided
 in the revised DP. Small quantities of
 Th-232 and Ra-226 were identified
 during investigational sampling of the
 Burning Grounds area, and DCGLs have
 been developed and submitted for
 approval as an addendum to the DP,
 Revision 2 (Derivation of the Site-
 Specific Soil DCGLs Addendum Soil
 DCGLs for Thorium and Radium). The
 revised DP does not change any
 previously approved remediation
 activities or DCGLs for uranium or
 cobalt-60 (Co-60) at the site. On
 February 26, 2010, and as supplemented
 on August 6, 2010, ABB, Inc. requested
 that NRC approve the proposed
 amendment. The licensee's request for
 the proposed change, including an
 opportunity to request a hearing or
 provide comments, was previously
 noticed in the **Federal Register** on
 February 15, 2011 (76FR8785).

The staff has prepared the EA in
 support of the proposed license
 amendment. The proposed actions will
 allow the licensee to continue to
 remediate the remainder of the site for
 eventual unrestricted use pending final
 status survey results. The licensee has
 obtained the proper permits from the
 State of Connecticut Department of
 Environmental Protection for the
 planned remediation activities

impacting the Site Brook. The DCGLs established in the DP Revision 2 for Ra-226 and Th-232 do not exceed the trigger levels requiring consultation with the U.S. Environmental Protection Agency (EPA) under the Memorandum of Understanding between the EPA and the NRC.

Need for the Proposed Action

The proposed action would allow ABB to complete the remaining Facility remediation and decommissioning activities, thereby reducing residual radioactivity at the Facility to a level that permits release of the entire property for unrestricted use and termination of the license. The licensee has been successfully remediating and decommissioning the Facility since 2004 under the previously-approved DP. In order to complete remediation of the entire Facility, the FUSRAP areas must be remediated. NRC is fulfilling its responsibilities under the Atomic Energy Act of 1954, as amended, to make a decision on a proposed license amendment for decommissioning that ensures safety and protection of the public and the environment.

Environmental Impacts of the Proposed Action

In preparing this EA, the NRC staff reviewed the 2004 EA issued in connection with the initial DP; the 2009 EA issued in conjunction with the DP Revision 1; the licensee's Environmental Report submitted on February 28, 2010; and the revised DP submitted in February 2010 and supplemented in August 2010. Additionally, the staff has continuously reviewed the performance of the decommissioning activities conducted by the licensee and their contractors through periodic inspections. The staff concluded that the bases for the findings of the 2004 and 2009 EAs remain valid, and are applicable to the revised DP. Regarding remediation of the FUSRAP areas, decommissioning methodologies are unchanged from the initial approved DP and remain appropriate for the contaminant concentrations found in the FUSRAP area soils. The same isotopes that were present in the Facility's non-FUSRAP areas (namely, those associated with enriched uranium and cobalt-60) exist in the FUSRAP areas as well. The FUSRAP areas requiring remediation are similar to those already successfully remediated and decommissioned at the Facility. The amount of waste in FUSRAP areas that will need to be packaged and shipped to a licensed disposal facility is similar to the amounts evaluated in the 2004 and 2009 EAs, and this waste will

be packaged and transported to the same disposal facility previously used for non-FUSRAP area remediation activities.

The revised DP includes new site-specific soil DCGLs for Ra-226 and Th-232, to support the unrestricted release of the impacted areas of the Burning Grounds. The staff's technical review confirmed that the licensee's requested site specific Ra-226 and Th-232 soil DCGLs of 4.5 and 4.0 picocuries/gram, respectively, would result in a maximum annual dose of less than 19 millirem of total effective dose equivalent, considering a resident farmer scenario and using the RESRAD 6.4 computer code to model the input parameters of the scenario and compute the dose to an individual. Because this dose is less than 25 millirem per year, use of these DCGLs will meet the radiological criteria for unrestricted release specified in 10 CFR 20.1402. The conclusions of the 2004 and 2009 EAs thus remain valid for the proposed action.

In summary, NRC staff has reviewed the revised decommissioning plan for the Facility, and examined the impact of the proposed additional decommissioning activities. Based upon its review, the staff has determined that environmental impacts associated with the proposed action are not greater than the impacts found in the 2004 and 2009 EAs, and are bounded by the impacts discussed in NUREG-1496, "A Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities," Volumes 1-3. The staff finds that there have been no significant environmental impacts to date from the use and cleanup of radioactive material at the Facility. The NRC staff reviewed the docket file records to identify any non-radiological hazards that may impact the environment surrounding the Facility, and no such hazards or impacts to the environment were identified. The NRC has identified no other radiological or non-radiological activities in the area that could result in cumulative environmental impacts.

The staff has considered the impact of the proposed FUSRAP area remediation at the Facility, and finds that the proposed action will not have a significant impact on the quality of the human environment.

Environmental Impacts of the Alternatives to the Proposed Action

The Facility is in the process of being decommissioned under an approved DP. Although the U.S. Army Corps of Engineers (USACE) has responsibility

for coordinating the radiological clean up in the FUSRAP areas, ABB entered into a formal agreement with the USACE and the NRC to conduct the clean up due to extensive comingling of FUSRAP and NRC licensed materials from past commercial operations in order to facilitate the efficient and effective decommissioning and clean up of the Facility. Therefore, the only alternative to the proposed action to continue the decommissioning process at the Facility is no action. The no-action alternative is not acceptable because it is inconsistent with NRC's Timeliness Rule (10 CFR 30.36), which requires licensees to decommission their facilities when licensed activities cease and to request termination of their radioactive materials license. Although termination of the NRC and USACE agreement would result in unnecessary remediation and decommissioning delay, the environmental impacts created by the action would be unchanged. Additionally, denying the amendment request would result in no change in current environmental impacts. The environmental impacts of the proposed action and the no-action alternative are therefore similar, and the no-action alternative is, accordingly, not considered further.

Conclusion

The NRC staff reviewed the environmental impacts of the proposed action in accordance with the requirements of 10 CFR 51 and NRC's unrestricted release criteria specified in 10 CFR 20.1402. The NRC staff has determined that incorporating the Facility's remaining FUSRAP areas into the site-wide DP would not significantly affect the quality of the human environment, and a FONSI is appropriate. Therefore, an environmental impact statement is not warranted for the proposed action, and pursuant to 10 CFR 51.32.

Agencies and Persons Consulted

This EA was prepared by NRC staff and coordinated with the following agencies: Connecticut Department of Environmental Protection and the U.S. Fish and Wildlife Services. NRC provided a draft of this EA to the Connecticut Department of Environmental Protection for review on April 29, 2011. On May 16, 2011, Michael Firsick of the Connecticut Department of Environmental Protection responded by e-mail. The State agreed with the conclusions of the EA.

III. Finding of No Significant Impact

On the basis of the EA, NRC has concluded that there are no significant

environmental impacts from the proposed amendment and has determined not to prepare an environmental impact statement.

IV. Further Information

Documents related to this action, including the application for

amendment and supporting documentation, are available electronically through the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you can access the NRC's Agencywide Document Access and Management

System (ADAMS), which provides text and image files of NRC's public documents.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2011-0119]

Office Of New Reactors; Proposed Revision 4 to Standard Review Plan; Section 8.1 on Electric Power—Introduction

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Solicitation of public comment.

SUMMARY: The NRC is soliciting public comment on NUREG-0800, “Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants,” on a proposed Revision 4 to Standard Review Plan (SRP), Section 8.1 on “Electric Power—Introduction,” (Agencywide Documents Access and Management System (ADAMS) Accession No. ML111180542). The previous version of this SRP section was published in March, 2007 as proposed Revision 3 (ADAMS Accession No. ML070550067). The current revision issues a new Branch Technical Position (BTP) 8-8 on “Onsite (Emergency Diesel Generators) and Offsite Power Sources Allowed Outage Time Extensions.” (ADAMS Accession No. ML111180521). The new BTP will be added to Chapter 8 of the SRP and Table 8-1 is updated to include the BTP 8-8.

The NRC staff issues notices to facilitate timely implementation of the current staff guidance and to facilitate activities associated with the review of amendment applications and review of design certification and combined license applications for NRO. The NRC staff intends to incorporate the final approved guidance into the next revision of NUREG-0800, SRP Section 8.1, Revision 4 and Regulatory Guide 1.206, “Combined License Applications for Nuclear Power Plants (LWR Edition),” June 2007.

DATES: Comments must be filed no later than June 30, 2011. Comments received after this date will be considered, if it

is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any one of the following methods. Please include Docket ID NRC-2011-0119 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site at <http://www.regulations.gov>. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.

Federal Rulemaking Web site: Go to <http://www.regulations.gov> and search for documents filed under Docket ID NRC-2011-0119. Address questions about NRC dockets to Carol Gallagher at 301-492-3668; e-mail at Carol.Gallagher@nrc.gov.

Mail comments to: Cindy K. Bladey, Chief, Rules, Announcements, and Directives Branch (RADB), Division of
