

that the work associated with digitization projects rarely concludes when the last scanned file is posted to a public site. The maintenance of digital projects requires an ongoing investment of both financial and human resources; not only must servers be supported and user queries answered, but rapid advances in technology are changing user expectations about how they want to discover, interact with, and share digital content. These changes are creating complicated new challenges for libraries, archives, and other institutions that wish to digitize and make available their local special and archival collections.

The project will consist of two parts: first, a survey asking representatives from a range of institutions to document existing practices and attitudes toward sustaining digitized special collections, and second, a series of case studies on innovative models for managing and sustaining digitized special collections (to be released in Spring 2012). This study will promote the spread of knowledge about library and museum experiments and initiatives to support digital projects, enabling both the leaders of current and future digital projects to develop more robust sustainability plans and also the funders and institutional administrators who support these projects to understand the factors and variables that help point towards success. This survey will attempt to gather data from a broad and representative range of cultural heritage organizations across the United States.

This survey is intended for libraries, archives, museums, and other cultural heritage organizations that have digitized some portion of their special collections or have arranged to have their special collections digitized by a third party. Please do not hesitate to contact the authors of the survey (see contact information below) if you are unsure whether the survey applies to your organization.

The survey is being distributed to leaders of libraries or other institutions that are: Recipients of IMLS funds for digitization projects from 1997 to the present, (through National Leadership Grants or via other routes such as LSTA funding) or Members of the Association of Research Libraries.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services (IMLS) is an independent Federal grant-making agency and is the primary source of federal support for the Nation's 123,000 libraries and 17,500 museums. IMLS provides a variety of grant programs to assist the Nation's museums and libraries in improving their operations and enhancing their services to the public. IMLS conducts policy research, analysis, and data collection to extend and improve the Nation's museum, library, and information services. The policy research, analysis, and data collection is used to: Identify national needs for and trends in museum, library, and information services; measure and report on the impact and effectiveness of museum, library, and information services throughout the United States; identify best practices; and develop plans to improve museum, library, and information services of the United States and strengthen national, State, local, regional, and international communications and cooperative networks. (20 U.S.C. Chapter 72, 20 U.S.C. 9108).

Abstract: This national survey of reference service providers in public and academic libraries is intended to help the IMLS Digital Collections and Content (DCC) project evaluate the Opening History resource. Opening History is a publicly available registry and repository of digital cultural heritage collections, expanded from a strong base of collections digitized through IMLS support. Approximately

1,000 cultural heritage institutions contribute to Opening History, including about 500 libraries and 130 museums. This data collection will survey reference service providers about the perceptions of Opening History, its quality and scope, and effectiveness in meeting needs of their local user communities. This collection is necessary to achieve a thorough understanding of how Opening History is used by its target audience and to determine the most effective use of IMLS resources with respect to future development of Opening History and the IMLS DCC.

Current Actions: This notice proposes clearance of the IMLS Digital Collections and Content: An Assessment of Opening History. The 60-day notice for the IMLS Digital Collections and Content: Opening History of Evaluation was published in the **Federal Register** on May 11, 2010, (FR vol. 75, No. 90, pg. 26283).
