### Substance Abuse and Mental Health Services Administration

#### Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the

quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

#### Proposed Project: Children Affected by Methamphetamine in Family Drug Treatment Court—NEW

In 2010, the Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), provided funding to 12 existing Family Treatment Drug Courts (FTDCs) for enhancement and/or expansion of their FTDC's capabilities to provide psycho-social, emotional and mental health services to children (0-17 years) and their families who have methamphetamine use disorders and involvement in child protective services. This program was authorized in House Report 111-220 accompanying HR 3293 in 2010. The Committee language stated that "these grants will support a collaborative approach, including treatment providers, child welfare specialists, and judges, to provide community-based social services for the children of methamphetamine-addicted parents," and were to be awarded to Family Dependency Treatment Drug Courts.

The proposed data collection for the grantees, referred to as the Children Affected by Methamphetamine in Family Treatment Drug Court (CAM-FTDC) project, will provide knowledge about the services needed and provided to these and similar families. The data to be collected by the CAM-FTDC program is SAMHSA's first Federal data collection effort focused specifically on the needs of children whose parents have a substance use disorder and are participating in an FTDC and on effective strategies to address their needs. The information collected through the CAM-FTDC program will benefit SAMHSA by providing an in-depth understanding of the needs of the children and families served by CAM-FTDC. Findings from this program will provide SAMHSA with valuable information regarding appropriate service interventions for this population and, ultimately, inform SAMHSA on how the agency can best meet the needs of future drug endangered children. The results from this data collection will serve to inform future decisions regarding funding by SAMHSA as well as establish an evidence base for the practices undertaken for other localities and programs implementing Family Treatment Drug Courts.
