

clothes dryers operate by blowing air through the wet clothes, condensing the water vapor in the airstream, and pumping the collected water into either a drain line or an in-unit container, these products do not use an exhaust port like a vented dryer does. BSH plans to market a condensing clothes dryer for situations in which a conventional vented clothes dryer cannot be used, such as high-rise apartments and condominiums, where construction does not permit the use of external venting.

Assertions and Determinations

BSH's Petition for Waiver

On December 28, 2009, BSH filed a petition for waiver from the test procedure applicable to residential clothes dryers set forth in 10 CFR part 430, subpart B, appendix D for particular models of condensing clothes dryer. On April 6, 2011, DOE published BSH's petition for waiver and granted BSH an interim waiver from the current test procedure. 76 FR 19087. DOE did not receive any comments on the BSH petition. DOE previously granted Miele Appliance, Inc. (Miele) a waiver from test procedures for two similar condenser clothes dryer models). 60 FR 9330 (Feb. 17, 1995). DOE also granted waivers for the same type of clothes dryer to LG Electronics (73 FR 66641, Nov. 10, 2008), Whirlpool Corporation (74 FR 66334, Dec. 15, 2009), General Electric (75 FR 13122, Mar. 18, 2010) and Miele (76 FR 17637, March 30, 2011). BSH claims that its condenser clothes dryers cannot be tested pursuant to the DOE procedure and requests that the same waiver granted to other manufacturers be granted for BSH's Bosch WTC82100US and Bosch WTE86300US models.

Therefore, for the reasons discussed above, and in light of the previous waivers to other manufacturers, DOE grants BSH's petition for waiver from testing of its Bosch WTC82100US and Bosch WTE86300US condenser clothes dryers.

Consultations With Other Agencies

DOE consulted with the Federal Trade Commission (FTC) staff concerning the BSH petition for waiver. The FTC staff did not have any objections to granting a waiver to BSH.

Conclusion

After careful consideration of all the material that was submitted by BSH and consultation with the FTC staff, it is ordered that:

(1) The petition for waiver submitted by BSH, Inc. (Case No. CD-006) is

hereby granted as set forth in the paragraphs below.

(2) BSH shall not be required to test or rate its Bosch WTC82100US and Bosch WTE86300US condensing clothes dryer models on the basis of the test procedures at 10 CFR part 430, subpart B, appendix D.

(3) This waiver shall remain in effect from the date this decision and order consistent with the provisions of 10 CFR 430.27(m).

(4) This waiver is issued on the condition that the statements, representations, and documentary materials provided by the petitioner are valid. DOE may revoke or modify this waiver at any time if it determines the factual basis underlying the petition for waiver is incorrect.

(5) This waiver applies to only those models specifically set out in BSH's petition. BSH may submit a new or amended petition for waiver and request for grant of interim waiver, as appropriate, for additional models of clothes dryers for which it seeks a waiver from the DOE test procedure. Grant of this petition for waiver also does not release a petitioner from any applicable certification requirements set forth at 10 CFR Part 429.

Issued in Washington, DC, on May 31, 2011.

Deputy Assistant Secretary for Energy Efficiency, Office of Technology Development, Energy Efficiency and Renewable Energy.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery (New).

ICR numbers: EPA ICR Nos. 2434.01 and 2435.01, OMB Control Nos. 2010-NEW.

ICR Status: These are new ICRs. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or

form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under these generic clearances will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 5.3 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Individuals and Households, Businesses
