

Estimated Total Annual Cost: \$138,991, which includes \$138,991 in labor costs, no capital/startup costs, and no operating and maintenance (O&M) costs.

Changes in the Estimates: There is a decrease in Respondent labor hours and an increase in labor cost. This is due to the fact that the rule for this subpart is now fully implemented. The previous ICR covered the initial phase of standard implementation which occurred over a three-year period. This ICR shows the labor hour and cost burden after full implementation. There have been no program changes.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On June 2, 2010 (75 FR 30813), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under docket ID number EPA-HQ-OECA-2010-0358, which is available for public viewing online at <http://www.regulations.gov>, or in person viewing at the Enforcement and Compliance Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket is (202) 566-1752. Use EPA's electronic docket and comment system at <http://www.regulations.gov> to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov>, as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. Title: NSPS for Portland Cement Plants (Renewal).

ICR Numbers: EPA ICR Number 1051.11, OMB Control Number 2060-0025.

ICR Status: This ICR is schedule to expire on July 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of

information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain- EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standards (NSPS) for Portland Cement Plants were proposed on August 17, 1971, promulgated on December 23, 1971, and amended on December 14, 1988, October 17, 2000, and September 9, 2010. Particulate matter emissions from Portland cement plants either cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare.

The control of emissions of particulate matter from Portland cement plants requires not only the installation of properly designed equipment, but also the operation and maintenance of that equipment. Emissions of particulate matter from Portland cement plants are the result of operation of kilns, clinker coolers, raw mill systems, raw mill dryers, raw material storage, clinker storage, finished product storage, conveyor transfer points, bagging and bulk loading and unloading systems. These standards rely on the capture of particulate emissions by a baghouse or electrostatic precipitator.

In order to ensure compliance with these standards, adequate reporting and recordkeeping is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart F and 40 CFR part 60, Subpart A, as authorized in section 112 and 114(a) of the Clean Air Act. The required information

consists of emissions data and other information that have been determined to be private.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 71 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Portland cement plants.

Estimated Number of Respondents: 118.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 17,666.

Estimated Total Annual Cost: \$2,766,659, which includes \$1,827,645 in labor costs, \$55,194 in capital/startup costs, and \$883,820 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no increase in the number of affected facilities, or the number of responses compared to the previous ICR. There is, however, an increase in the estimated hours, and labor burden cost as currently identified in the OMB Inventory of Approved Burdens. This change in burden has occurred because this renewal ICR is being combined with EPA ICR number 2307.02, which resulted in an increase in burden hours and cost.

The combining of this ICR with ICR number 2307.02 also resulted in an increase in capital/startup vs. O&M costs.

Dated: May 31, 2011.

Director, Collection Strategies Division.
