SUPPLEMENTARY INFORMATION: Established in 1902, Reclamation has constructed more than 600 dams and reservoirs in the 17 western states along with powerplants and canals at many of those facilities. Reclamation is a water management agency that assists in meeting the increasing water demands of the West while protecting the environment and the public’s investment in these structures. Water management efforts emphasize fulfilling water delivery obligations, water conservation, water recycling and reuse, and developing partnerships with our customers, states, and Native American Tribes, and in finding ways to bring together the variety of interests to address the competing needs for our limited water resources.

As part of securing America’s energy future, the nation is moving toward a clean-energy economy. Interior has been changing the way it does business by opening its doors to responsible development of renewable energy on its public lands. Interior is facilitating environmentally appropriate renewable-energy projects involving solar, wind and waves, geothermal, biofuels and hydropower. These resources, developed in the right ways and the right places, are intended to curb the dependence on foreign oil, reduce use of fossil fuels, and promote new industries.

This RFI is being issued under authority granted to Reclamation in Section 10 (43 U.S.C. 387) of the Reclamation Act of 1939 which provides the Secretary the authority, at his discretion, to grant leases, licenses, easements, and rights-of-way.

Dated: May 26, 2011.

Acting Operations Manager, Mid-Pacific Region.
