vinyl polymers), brake fluid, coolant, electrolytes (chemical), labels and film, separators (plastic), plastic fittings/ gaskets/grommets/emblems, v-belts, tires, tool sets, glass, mirrors, fasteners, tabs, locks, springs, rings, insulators, electrodes (anode, cathode), gaskets, valves, bearings, oil coolers, flywheels, pulleys, shaft couplings, sprockets, spacers, motors, battery chargers, magnets, batteries and related parts, electrical components, electronic controllers and modules, audio components, sensors, antennas, cables, wiring sets, connectors, brake parts (wireless), knobs, and junction boxes (duty rate range: Free—9.0%).

Expanded FTZ procedures could exempt NNA from customs duty payments on the foreign-origin components used in electric passenger vehicles and lithium-ion batteries manufactured for export. On its domestic shipments, NNA would be able to choose the duty rate during customs entry procedures that applies to electric passenger vehicles (duty rate —2.5%) and lithium-ion batteries (3.4%) for the foreign inputs noted above. Customs duties also could possibly be deferred or reduced on foreign status production equipment. NNA would also be exempt from duty payments on foreign inputs that become scrap during the production process.

In accordance with the Board’s regulations, Pierre Duy of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.
