

Continental Shelf of the United States, the resources thereof and the waters superjacent thereto; and the recreational, economic, and scenic values of such waters and resources.

Precautionary area means a routing measure comprising an area within defined limits where vessels must navigate with particular caution and within which the direction of traffic flow may be recommended.

Traffic lane means an area within defined limits in which one-way traffic is established. Natural obstacles, including those forming separation zones, may constitute a boundary.

Traffic Separation Scheme or *TSS* means a routing measure aimed at the separation of opposing streams of traffic by appropriate means and by the establishment of traffic lanes.

Vessel routing system means any system of one or more routes or routing measures aimed at reducing the risk of casualties; it includes traffic separation schemes, two-way routes, recommended tracks, areas to be avoided, no anchoring areas, inshore traffic zones, roundabouts, precautionary areas, and deep-water routes.

SUPPLEMENTARY INFORMATION:

Background and Purpose

The Coast Guard published a notice of study in the **Federal Register** on December 10, 2009 (74 FR 65543), entitled "Port Access Route Study: Off San Francisco" and completed the study in February, 2011.

The study area encompassed the traffic separation scheme off San Francisco and extended to the limit of the Coast Guard San Francisco Vessel Traffic Service (VTS) area of responsibility in order to analyze traffic patterns of vessels departing from or approaching the current traffic lanes. The VTS area covers the seaward approaches within a 38 nautical mile radius of Mount Tamalpais (37[deg] 55.8'N, 122[deg] 34.6'W). The coverage area is annotated on National Oceanic and Atmospheric Administration (NOAA) chart number 18645.

The primary purpose of the study was to reconcile the need for safe access routes with other reasonable waterway uses, to the extent practical. The goal of the study was to help reduce the risk of marine casualties and increase the efficiency of vessel traffic in the study area. When vessels follow predictable and charted routing measures, congestion may be reduced, and mariners may be better able to predict where vessel interactions may occur and act accordingly. The Coast Guard studied whether extending the traffic separation scheme would increase the

predictability of vessel movements and what the impact might be on fishing vessels operating in the area. The study also assessed potential impacts on the Gulf of the Farallons and Cordell Bank National Marine Sanctuaries and the marine environment if the traffic lanes were extended or modified. The Coast Guard announced the notice of study in the **Federal Register** on December 10, 2009 (74 FR 65543), entitled "Port Access Route Study: Off San Francisco." Due to the lack of a substantive number of comments in response to the original notice and our strong desire to engage the public in the study process, we announced a public meeting to be held October 20, 2010 at the Executive Inn and Suites in Oakland California. The Coast Guard also sent out a press release to local media and news outlets to help solicit public comment.

The recommendations of the PARS are based in large part on the comments received, public outreach, and consultation with other government agencies.

Study Recommendations

The PARS evaluated 5 separate concerns that resulted in 7 recommendations intended to improve the safety of vessel traffic in the study area, as well as adhere to governing regulations regarding the National Marine Sanctuaries. The actual PARS should be consulted for a detailed explanation of each recommendation. The PARS also contains a chartlet of the proposed changes to the TSS. It can be accessed as described in the Viewing the comments and "Port Access Route Study Approaches to San Francisco Bay" February 2011 section of this notice. The PARS recommendations include:

- Extend the northern TSS 17nm to the northern end of the VTS San Francisco area of responsibility.
- Add a dog leg turn in the northern TSS just below the 38th parallel to keep vessels on a predictable path in a prime area for fishing.
- Change the current flared configuration of the northern TSS to a 3 mile wide approach. The 3 mile wide TSS would consist of 1 nautical mile wide lanes, separated by a 1 nautical mile wide separation zone.
- Extend the western TSS 3nm seaward to the 200 fathom contour at the edge of the continental shelf.
- Shift the seaward end of the outbound lane closest to the Farallon Islands in the western TSS 3.7 nautical miles to the south. No shift in the inbound lane of the western TSS.
- Change the current flared configuration of the western TSS to a 3

mile wide approach. The 3 mile wide TSS would consist of 1 nautical mile wide lanes, separated by a 1 nautical mile wide separation zone.

- Extend the southern TSS 8.5NM to the southern end of the VTS San Francisco area of responsibility.

Conclusion

The PARS contains 7 recommendations, which would require the approval of the International Maritime Organization for implementation. The Coast Guard will follow the Federal rulemaking process for implementation of any of the proposed changes to the traffic separation schemes. This process will also include section 7 consultations with the National Marine Fisheries Service in accordance with the Endangered Species Act. This will provide ample opportunity for additional comments on proposed changes to the existing vessel routing system through a notice of proposed rulemaking (NPRM) published in the **Federal Register**.

Dated: May 20, 2011.

J.R. Castillo,

Rear Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

BILLING CODE 9110-04-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 63

[EPA-HQ-OAR-2005-0084; FRL-9320-7]

RIN 2060-AM37

Amendments to National Emission Standards for Hazardous Air Pollutants for Area Sources: Plating and Polishing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On June 12, 2008, EPA issued national emission standards for control of hazardous air pollutants (HAP) for the plating and polishing area source category under section 112 of the Clean Air Act (CAA). In today's action, EPA is proposing to amend the national emission standards for control of hazardous air pollutants (NESHAP) for the plating and polishing area source category published on June 12, 2008. The amendments to the area source standards for plating and polishing area sources would clarify that the emission control requirements of the plating and polishing area source NESHAP do not

apply to any bench-scale activities. Also, the amendments include several technical corrections and clarifications that do not make significant changes in the rule's requirements. In the "Rules and Regulations" section of this **Federal Register**, we are amending the area source standards for plating and polishing area sources as a direct final rule without a prior proposed rule. If we receive no adverse comment, we will not take further action on this proposed rule.

DATES: Written comments must be received by July 20, 2011. If EPA receives adverse comment, we will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2005-0084, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.

- *E-mail:* Comments may be sent by electronic mail (e-mail) to *a-and-r-docket@epa.gov*, Attention Docket ID No. EPA-HQ-OAR-2005-0084.

- *Fax:* Fax your comments to: (202) 566-9744, Attention Docket ID No. EPA-HQ-OAR-2005-0084.

- *Mail:* Send your comments to: Air and Radiation Docket and Information Center, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, Attention Docket ID No. EPA-HQ-OAR-2005-0084. Please include a total of two copies.

- *Hand Delivery:* In person or by courier, deliver comments to: EPA Docket Center, Room 3334, 1301 Constitution Avenue, NW., Washington, DC 20004. Such deliveries are accepted only during the Docket's normal hours of operation and special arrangements should be made for deliveries of boxed information. Please include a total of two copies.

Instructions: Direct your comments to Docket ID No. EPA-HQ-OAR-2005-0084. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you

consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *www.regulations.gov* Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the EPA Docket Center, Public Reading Room, EPA West Building, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m. Eastern Standard Time (EST), Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Air and Radiation Docket is (202) 566-1742.

FOR FURTHER INFORMATION CONTACT: Dr. Donna Lee Jones, Sector Policies and Programs Division, Office of Air Quality Planning and Standards (D243-02), Environmental Protection Agency, Research Triangle Park, North Carolina 27711, *telephone number:* (919) 541-5251; *fax number:* (919) 541-3207; *e-mail address:* *Jones.DonnaLee@epa.gov*.

SUPPLEMENTARY INFORMATION: The information presented in this preamble is organized as follows:

I. Why is EPA issuing this proposed rule?

- II. Does this action apply to me?
- III. Where can I get a copy of this document?
- IV. Why are we amending this rule?
- V. What amendments are we making to this rule?
- VI. Statutory and Executive Order Reviews
 - A. Executive Order 12866: Regulatory Planning and Review
 - B. Paperwork Reduction Act
 - C. Regulatory Flexibility Act
 - D. Unfunded Mandates Reform Act
 - E. Executive Order 13132: Federalism
 - F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments
 - G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks
 - H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use
 - I. National Technology Transfer Advancement Act
 - J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

I. Why is EPA issuing this proposed rule?

This document proposes to take action on amendments to the national emission standards for plating and polishing operations that are area sources (40 CFR part 63, subpart WWWWWW). We have published a direct final rule amending the area source standards for plating and polishing operations in the "Rules and Regulations" section of this **Federal Register** because we view this as a noncontroversial action and anticipate no adverse comment. We have explained our reasons for this action in the preamble to the direct final rule.

If we receive no adverse comment by July 20, 2011, we will not take further action on this proposed rule. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We would address all public comments in any subsequent final rule based on this proposed rule.

We do not intend to institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information, please see the information provided in the **ADDRESSES** section of this document.

II. Does this action apply to me?

The regulated categories and entities potentially affected by the proposed rule include:

Category	NAICS code ¹	Examples of regulated entities
Industry	332813	Area source facilities engaged in any one or more types of nonchromium electroplating; electropolishing; electroforming; electroless plating, including thermal metal spraying, chromate conversion coating, and coloring; or mechanical polishing of metals and formed products for the trade. Regulated sources do not include chromium electroplating and chromium anodizing sources, as those sources are subject to 40 CFR part 63, subpart N, "Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks."
Manufacturing	32,33	Area source establishments engaged in one or more types of nonchromium electroplating; electropolishing; electroforming; electroless plating, including thermal metal spraying, chromate conversion coating, and coloring; or mechanical polishing of metals and formed products for the trade. Examples include: 33251, Hardware Manufacturing; 323111, Commercial Gravure Printing; 332116, Metal Stamping; 332722, Bolt, Nut, Screw, Rivet, and Washer Manufacturing; 332811, Metal Heat Treating; 332812, Metal Coating, Engraving (except Jewelry and Silverware), and Allied Services to Manufacturers; 332913, Plumbing Fixture Fitting and Trim Manufacturing; Other Metal Valve and Pipe Fitting Manufacturing; 332999, All Other Miscellaneous Fabricated Metal Product Manufacturing; 334412, Bare Printed Circuit Board Manufacturing; 336412, Aircraft Engine and Engine Parts Manufacturing; and 339911, Jewelry (except Costume) Manufacturing.

¹ North American Industry Classification System.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this proposed action. To determine whether your facility would be regulated by this proposed action, you should examine the applicability criteria in 40 CFR 63.11475 of subpart WWWW (NESHAP: Area Source Standards for Plating and Polishing Operations). If you have any questions regarding the applicability of this action to a particular entity, consult either the air permit authority for the entity or your EPA regional representative as listed in § 63.13 of the General Provisions to part 63 (40 CFR part 63, subpart A).

III. Where can I get a copy of this document?

In addition to being available in the docket, an electronic copy of this proposed action will also be available on the Worldwide Web (WWW) through the Technology Transfer Network (TTN). Following signature, a copy of this proposed action will be posted on the TTN's policy and guidance page for newly proposed or promulgated rules at the following address: <http://www.epa.gov/ttn/oarpg/>. The TTN provides information and technology exchange in various areas of air pollution control.

IV. Why are we amending this rule?

On July 1, 2008 (73 FR 37741), we issued the NESHAP for Area Sources: Plating and Polishing (40 CFR part 63, subpart WWWW). The final rule establishes air emission control requirements for new and existing facilities that are area sources of hazardous air pollutants. The final

standards establish emission standards in the form of management practices for new and existing tanks, thermal spraying equipment, and dry mechanical polishing equipment in certain plating and polishing processes. These final emission standards reflect EPA's determination regarding the generally achievable control technology (GACT) and management practices for the area source category.

In the time period since promulgation, it has come to our attention that certain aspects of the rule as promulgated have led to misinterpretations, inconsistencies, and confusion regarding the applicability of the rule. Therefore, we are amending and correcting parts of the rule to address these issues.

V. What are the changes to the area source NESHAP for plating and polishing operations?

We are amending this rule to clarify and correct inconsistencies and inadequacies of the rule language that have come to our attention since promulgation. For a detailed description of the proposed amendments, see the information provided in the direct final rule published in the Rules and Regulations section of this **Federal Register**.

VI. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13565: Improving Regulation and Regulatory Review

This action is not a "significant regulatory action" under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is therefore not

subject to review under Executive Orders 12866 and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act

This action does not impose any new information collection burden. These proposed amendments clarify that the emission control requirements of the plating and polishing area source rule do not apply to bench-scale activities. Also, several technical corrections and clarifications that do not make material changes in the rule's requirements have been made to the rule text. No new burden is associated with these requirements because the burden was included in the approved information collection request (ICR) for the existing rule. However, the Office of Management and Budget (OMB) has previously approved the information collection requirements contained in the existing regulations (40 CFR part 63 subpart WWWW) under the provisions of the *Paperwork Reduction Act*, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number control number 2060-0623. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule would not have a significant economic impact on a substantial number of small entities. Small entities include small businesses,

small not-for-profit enterprises, and small governmental jurisdictions.

For the purposes of assessing the impacts of this proposed rule on small entities, small entity is defined as: (1) A small business that meets the Small Business Administration size standards for small businesses at 13 CFR 121.201 (whose parent company has fewer than 500 employees for NAICS code 332813); (2) a small governmental jurisdiction that is a government of a city, county, town, school district, or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of this proposed rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. We have determined that the small entities in this area source category will not incur any adverse impacts because this action makes only technical corrections and clarifications that increase flexibility and does not create any new requirements or burdens. No costs are associated with these amendments to the NESHAP.

D. Unfunded Mandates Reform Act

This action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector. The action imposes no enforceable duty on any State, local or tribal governments or the private sector. The term “enforceable duty” does not include duties and conditions in voluntary Federal contracts for goods and services. Thus, this action is not subject to the requirements of sections 202 or 205 of the UMRA.

This action is also not subject to the requirements of section 203 of UMRA because it contains no regulatory requirements that might significantly or uniquely affect small governments. The technical corrections and clarifications made through this action contain no requirements that apply to such governments, impose no obligations upon them, and will not result in any expenditures by them or any disproportionate impacts on them.

E. Executive Order 13132: Federalism

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government, as specified in Executive Order 13132. The proposed rule makes certain technical corrections and clarifications to the NESHAP for plating and polishing area sources. These proposed corrections and clarifications do not impose requirements on State and local governments. Thus, Executive Order 13132 does not apply to the proposed rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 6, 2000). This proposed rule makes certain technical corrections and clarifications to the NESHAP for plating and polishing area sources. These proposed corrections and clarifications do not impose requirements on tribal governments. They also have no direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997) as applying to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it makes technical corrections and clarifications to the area source NESHAP for plating and polishing area sources which is based solely on technology performance.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This proposed action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) of 1995 (Pub. L. 104–113, section 12(d), 15 U.S.C. 272 note) directs EPA to use voluntary consensus

standards (VCS) in its regulatory activities, unless to do so would be inconsistent with applicable law or otherwise impractical. The VCS are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by VCS bodies. The NTTAA directs EPA to provide Congress, through the Office of Management and Budget, explanations when the Agency does not use available and applicable VCS.

This proposed rule does not involve technical standards. Therefore, EPA did not consider the use of any VCS.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, February 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this proposed rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. The technical corrections and clarifications in this proposed rule do not change the level of control required by the NESHAP.

List of Subjects in 40 CFR Part 63

Environmental protection, Administrative practice and procedure, Air pollution control, Hazardous substances, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: June 14, 2011.

Lisa P. Jackson,
Administrator.

[FR Doc. 2011–15273 Filed 6–17–11; 8:45 am]

BILLING CODE 6560–50–P
