National Institute of General Medical Sciences; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of General Medical Sciences Special Emphasis Panel; Institutional Postdoctoral Training Programs.

Date: July 27–28, 2011.

Time: 9 a.m. to 5 p.m.

Agenda: To review and evaluate contract proposals.

Place: Courtyard by Marriott Chevy Chase, 5520 Wisconsin Avenue, Chevy Chase, MD 20815.

Contact Person: Brian R. Pike, PhD, Scientific Review Officer, Office of Scientific Review, National Institute of General Medical Sciences, National Institutes of Health, 45 Center Drive, Room 3AN18, Bethesda, MD 20892, 301–594–3907, pikbr@mail.nih.gov.

(Catalogue of Federal Domestic Assistance Program Nos. 93.375, Minority Biomedical Research Support; 93.821, Cell Biology and Biophysics Research; 93.859, Pharmacology, Physiology, and Biological Chemistry Research; 93.862, Genetics and Developmental Biology Research; 93.88, Minority Access to Research Careers; 93.96, Special Minority Initiatives, National Institutes of Health, HHS)

Dated: June 16, 2011.

Jennifer Spaeth,
Director, Office of Federal Advisory Committee Policy.

National Institutes of Health

Prospective Grant of Exclusive License; The Development of Ulipristal Acetate for the Treatment of Symptomatic Uterine Fibroids

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR part 404.7(a)(1)(i), that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant to PregLem SA of an exclusive patent license to practice the inventions embodied in US Patent Application 12/021,610 entitled, “Method for Treating Uterine Fibroids” [HHS Ref. E–057–2008/0–US–01], and all continuing applications and foreign counterparts. The patent rights in this invention have been assigned to the Government of the United States of America and to Laboratoire HRA Pharma. The exclusive license contemplated in this notice is solely to the patent rights assigned to the
Government of the United States of America.

The prospective exclusive license territory may be worldwide, and the field of use may be limited to:

The use of ulipristal acetate for the treatment of symptomatic uterine fibroids.

DATES: Only written comments and/or applications for a license which are received by the NIH Office of Technology Transfer on or before July 22, 2011 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Patrick P. McCue, Ph.D., Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804; Telephone: (301) 435–5560; Facsimile: (301) 402–0220; E-mail: mccuepat@mail.nih.gov.

SUPPLEMENTARY INFORMATION: This invention concerns methods for the treatment of symptomatic uterine fibroids using a selective progesterone receptor modulator compound, ulipristal acetate (a.k.a. CDB–2914). Ulipristal acetate reversibly binds the progesterone receptor with high affinity and little or no anti-glucocorticoid activity. Proposed clinical indications for ulipristal acetate include emergency/daily contraception, treatment of uterine fibroids, endometriosis, dysfunctional uterine bleeding, and cancer.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR part 404.7. The prospective exclusive license may be granted unless, within thirty (30) days from the date of this published notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Dated: June 14, 2011.

Richard U. Rodriguez,
Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

National Institutes of Health

Prospective Grant of Exclusive License; Devices for Clearing Mucus From Endotracheal Tubes

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i), that the National Institutes of Health (NIH), Department of Health and Human Services (HHS), is contemplating the grant of a worldwide exclusive license, to practice the invention embodied in: HHS Ref. No. E–074–2005/0 “Mucus Slurping Endotracheal Tube”; U.S. Patent 7,503,328 to Oculus Innovative Sciences, Inc., a company incorporated under the laws of the State of California having its headquarters in Petaluma, California. The United States of America is the assignee of the rights of the above inventions. The contemplated exclusive license may be granted in a field of use limited to devices for clearing mucus from endotracheal tubes.

DATES: Only written comments and/or applications for a license received by the NIH Office of Technology Transfer on or before July 22, 2011 will be considered.

ADDRESSES: Requests for a copy of the patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Michael A. Shmilovich, Esq., Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804; Telephone: (301) 435–5019; Facsimile: (301) 402–0220; E-mail: shmilovm@mail.nih.gov. A signed confidentiality nondisclosure agreement will be required to receive copies of any patent applications that have not been published or issued by the United States Patent and Trademark Office or the World Intellectual Property Organization.

SUPPLEMENTARY INFORMATION: The patent intended for licensure covers a mucus slurping device used to remove mucus before it reaches the tip of the endotracheal tube (ETT). A continuous aspiration endotracheal tube for subglottic secretions is fitted at its distal-most tip with a molded, hollow, concentric plastic ring with 3–4 (or more) small (less than l mm in diameter) suction ports, the latter positioned in the most dependent part of the ETT. A suction line is extended to the tip of the ETT and suction was activated for approximately half of a second synchronized to the early part of expiration; and repeated once a minute, or as desired. Studies involving intubated sheep showed that all mucus was cleared from test animal and that mucus samples collected showed no infections that typically put patients at risk for ventilator associated pneumonia.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within thirty (30) days from the date of this published notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: June 14, 2011.

Richard U. Rodriguez,
Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

Substance Abuse and Mental Health Services Administration

Center for Substance Abuse Prevention; Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Substance Abuse and Mental Health Services Administration’s (SAMHSA) Center for Substance Abuse Prevention (CSAP) Drug Testing Advisory Board (DTAB) on July 12 and 13, 2011. The DTAB will convene in both open and closed sessions over these two days. On July 13 from 10 a.m. to 12:30 p.m. E.D.T., the meeting will be open to the public to review public responses to SAMHSA’s Request for Information on oral fluid as a potential alternative specimen under the Mandatory Guidelines for Federal Workplace Drug Testing Programs. In addition, the
