SUPPLEMENTARY INFORMATION:

Title: Livestock Slaughter Survey.

OMB Control Number: 0535-0005.

Approval Expires: November 30, 2011.

Type of Request: To revise and extend a currently approved information collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices, as well as the Census of Agriculture.

Livestock slaughter data are used to estimate U.S. red meat production and reconcile inventory estimates which provide producers and the rest of the industry with current and future information on market supplies. This data is also used in preparing production, disposition, and income statistics which facilitate more orderly production, marketing, and processing of livestock and livestock products.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3501, *et seq.*) and Office of Management and Budget regulations at 5 CFR part 1320.

NASS also complies with OMB Implementation Guidance, "Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA)," **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33362.

Estimate of Burden: The Livestock Slaughter Survey includes a weekly survey of 900 Federally Inspected (FI) slaughter plants and monthly/quarterly surveys of approximately 1,950 Non-Federally Inspected (NFI) slaughter facilities. Public reporting burden for this collection of information is estimated to average 10 to 15 minutes per response for an estimated annual burden of 3,335 hours. (The USDA inspectors are not included in the
