SUPPLEMENTARY INFORMATION: The majority of geothermal energy growth occurred prior to 1990. In recent years, the growth of geothermal capacity in the U.S. has lagged that of solar and wind energy. The purpose of the Blue Ribbon Panel meeting was to identify the obstacles to geothermal energy growth, discuss the appropriate role of DOE in enabling geothermal energy, and recommend priority research and development areas. The 15 panelists included experts from the geothermal and oil/gas industries, finance institutions, utilities, universities, and national laboratories.

This notice requests public comment on the recommendations and discussions captured in the Geothermal Blue Ribbon Panel Report.

Public Participation Policy

It is the policy of the Department to ensure that public participation is an integral and effective part of DOE activities, and that decisions are made with the benefit of significant public input and perspectives.

The Department recognizes the many benefits to be derived from public participation for both stakeholders and DOE. Public participation provides a means for DOE to gather a diverse collection of opinions, perspectives, and values from the broadest spectrum of the public, enabling the Department to make more informed decisions. Public participation benefits stakeholders by creating an opportunity to provide input on decisions that affect their communities and our nation.
