AGENCY: Departmental Offices, Treasury.

ACTION: Notice of proposed New Privacy Act System of Records.

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, as amended, 5 U.S.C. 552a, the Department of the Treasury, gives notice of a proposed new system of records entitled "Treasury/DO .226—Validating EITC Eligibility with State Data Pilot Project Records."

SUPPLEMENTARY INFORMATION: The Department of the Treasury (Departmental Offices and the Internal Revenue Service) is conducting a pilot project funded by the Partnership Fund for Program Integrity Innovation (Partnership Fund). The Partnership Fund was established by the Consolidated Appropriations Act, 2010 (Pub. L. 111-117, 123 Stat. 3034, 3171-3172) to fund pilot projects to improve delivery of Federal assistance programs administered through State and local governments, or where Federal-State cooperation could be beneficial. Congress appropriated funds to the Office of Management and Budget (OMB) and authorized it to transfer such funds to appropriate agencies to carry out pilot projects and to provide for the evaluation of such projects. The Department submitted a pilot concept to OMB to assess the usefulness of State-administered benefits data in validating Earned Income Tax Credit (EITC) eligibility, including the identification of individuals who are eligible for but have not claimed the EITC.

The Department proposes to obtain State-administered benefits data for a prior calendar year from up to five States. The pilot would evaluate whether State-administered benefits data could identify both ineligible individuals who receive improper EITC payments and eligible individuals who are not claiming the EITC. The assessment will be conducted separate from, but parallel to, normal Federal

EITC operations. The Department will not use the data collected from States to intervene in the current tax filing season to stop improper EITC payments to ineligible individuals or attempt to initiate new claims for eligible individuals. Data from the pilot will not be used to adjust or correct a tax return.

The Department's Internal Revenue Service (IRS) will match the data collected from the States against data contained in IRS databases. The data matching analysis will be conducted in two stages. The first stage will entail automated database matching between information contained in IRS databases and the State-administered benefits data collected from the States to identify the positive and negative EITC eligibility matches. In the second stage, the results of the first stage will be validated by selecting a sample of the positive and negative matches and conducting interviews and individual case file research with State personnel to determine the extent to which the automated database matching may have generated false positives and false negatives. This two stage process will ensure the credibility of the automated results by confirming actual family circumstances and will allow for the development of the most reliable data matching protocol that could be used nationally to improve EITC eligibility determinations and reduce improper tax refund payments.

As required by 5 U.S.C. 552a(r), a report of a new system of records has been provided to the Committee on Oversight and Government Reform of the House of Representatives, the Committee on Homeland Security and Governmental Affairs of the Senate, and OMB.

The system of records entitled "Treasury/DO .226—Validating EITC Eligibility with State Data Pilot Project Records" is published in its entirety below.
