SUPPLEMENTARY INFORMATION:

I. Abstract

The President's Proclamation on Steel Safeguards mandated that the Departments of Commerce and Treasury institute an import licensing system to

facilitate the monitoring of certain steel imports. Regulations were established that implemented the Steel Import Monitoring and Analysis (SIMA) System and expanded on the licensing system for steel that was part of those safeguards. The import license information is necessary to assess import trends of steel products.

In order to effectively monitor steel imports, Commerce must collect and provide timely aggregated summaries about the imports. The Steel Import License is the tool used to collect the necessary information. The Census Bureau currently collects import data and disseminates aggregate information about steel imports. However, the time required to collect, process, and disseminate this information through Census can take up to 90 days after importation of the product, giving interested parties and the public far less time to respond to injurious sales.

II. Method of Collection

The license application can be submitted electronically (<http://www.ita.doc.gov/steel/license>) or completed electronically and faxed.

Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation; Final Results of the Expedited Sunset Review of Antidumping Duty Order

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On March 1, 2011, the Department of Commerce ("the Department") initiated a second sunset review of the suspended antidumping duty investigation on solid fertilizer grade ammonium nitrate ("ammonium nitrate") from the Russian Federation ("Russia").¹ Effective May 2, 2011, the Department terminated the agreement suspending the antidumping duty investigation and issued an antidumping duty order on ammonium nitrate from Russia. On the basis of the notice of intent to participate, an adequate substantive response submitted on behalf of the domestic interested parties, and no participation from respondent interested parties, the Department conducted an expedited sunset review of the antidumping duty order pursuant to section 751(c)(3)(B) of the Tariff Act of 1930, as amended ("Act") and 19 CFR 351.218(e)(1)(ii)(C). As a result of this sunset review, the Department determined that termination of the antidumping duty order would be likely to lead to continuation or recurrence of dumping at the levels listed below in the section entitled "Final Results of Review."

DATES: *Effective Date:* July 7, 2011.

FOR FURTHER INFORMATION CONTACT: Julie H. Santoboni or Judith Wey Rudman, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230; *telephone:* 202-482-3063 or 202-482-0192, respectively.

SUPPLEMENTARY INFORMATION:

History of the Suspension Agreement and Order

On August 12, 1999, the Department initiated an antidumping duty investigation on ammonium nitrate from Russia under section 732 of the Act. *See Initiation of Antidumping Duty Investigation: Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation*, 64 FR 45236 (August 19,

1999). On January 7, 2000, the Department preliminarily determined that ammonium nitrate from Russia was being, or was likely to be, sold in the United States at less than fair value. *See Notice of Preliminary Determination of Sales at Less Than Fair Value: Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation*, 65 FR 1139 (January 7, 2000).

The Department suspended the antidumping duty investigation on ammonium nitrate from Russia, effective May 19, 2000. The basis for this action was an agreement between the Department and the Ministry of Trade of the Russian Federation ("MOT") (the predecessor to the current Ministry of Economic Development ("MED")) accounting for substantially all imports of ammonium nitrate from Russia, wherein the MOT agreed to restrict exports of ammonium nitrate from all Russian producers/exporters to the United States and to ensure that such exports were sold at or above the agreed reference price. *See Suspension of Antidumping Duty Investigation: Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation*, 65 FR 37759 (June 16, 2000) ("*Suspension Agreement*").

Thereafter, pursuant to a request by the petitioner, the Committee for Fair Ammonium Nitrate Trade ("COFANT"), the Department completed its investigation and published in the **Federal Register** its final determination of sales at less than fair value. *See Notice of Final Determination of Sales at Less Than Fair Value; Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation*, 65 FR 42669 (July 11, 2000) ("*Final Determination*"). In the *Final Determination*, the Department calculated weighted-average dumping margins of 253.98 percent for JSC Nevinnomyssky Azot, a respondent company in the investigation, and for the Russia-wide entity.

On March 31 and April 1, 2005, respectively, the International Trade Commission ("ITC") instituted, and the Department initiated, a five-year sunset review of the suspended antidumping investigation on ammonium nitrate from Russia. The Department concluded that termination of the suspended antidumping investigation would be likely to lead to continuation or recurrence of dumping and the ITC concluded that termination of the suspended investigation would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time. *See Final Results of Five-year Sunset Review of Suspended Antidumping Duty Investigation on*

¹ *See Initiation of Five-Year ("Sunset") Review*, 76 FR 11202 (March 1, 2011) ("*Notice of Initiation*").
