

Woman Creek, OH National Estuarine Research Reserve.

SUMMARY: The Estuarine Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce has approved the ACE Basin, SC National Estuarine Research Reserve and Old Woman Creek, OH National Estuarine Research Reserve Management Plan Revisions.

The revised management plan for the ACE Basin, SC National Estuarine Research Reserve outlines the administrative structure; the education, training, stewardship, and research programs of the reserve; and the plans for future land acquisition and facility development to support reserve operations. The objectives described in this plan address the most critical coastal issues in ACE Basin related to habitat conservation, water quality, community resilience, and public access. Since the last approved management plan in 1992, the reserve has become fully staffed; added a Coastal Training Program that delivers science-based information to key decision makers; and added significant monitoring of emergent marsh vegetation, water quality, and invasive species. In addition to programmatic and staffing advances, the reserve has constructed an interpretive center that houses educational exhibits, classrooms, offices, conference space, trails and dock with public access. A field station with lab facilities, research dock, and accommodations for visiting researchers has also been constructed.

This management plan amends the boundary to include 4,687 acres of the Botany Bay Plantation located adjacent to the northeastern corner of Edisto Island in lower Charleston County, SC. South Carolina Budget and Control Board is the property owner and has a cooperative partnership with South Carolina Department of Natural Resources to manage the Botany Bay Plantation as a Wildlife Management Area and Heritage Preserve property. The undeveloped coastal habitats of the plantation include maritime forest, coastal shrub, wetlands, tidal marshes and sand beaches. The property provides important habitat for numerous wildlife species, including critical nesting habitat for the Federally threatened loggerhead sea turtle and the state threatened least tern. The lands contain significant cultural resources and list several sites on the National Register of Historic Places. This management plan amends the boundary

by also removing 40,089 acres of private lands previously counted in error. In total, the ACE Basin Reserve includes 99,308 acres designated for long term research, education and stewardship. The revised management plan is available at: <http://www.dnr.sc.gov/marine/NERR/index.html>.

The revised management plan for the Old Woman Creek, OH National Estuarine Research Reserve contains the collective vision, mission, goals, and objectives of the reserve; updates the reserve boundary; as well as outlines plans for facility use and development to support reserve operations. The objectives described in this plan address the most critical coastal issues of the reserve related to water quality (non-point source pollution), invasive species, habitat loss and regional ecosystem impacts of climate change. Since the last approved management plan in 2000, the reserve has all core staff; added a Coastal Training Program that delivers science-based information to key decision makers; and developed partnerships to continue to restore and protect land and waters in the Old Woman Creek watershed. In addition to programmatic and staffing advances, the reserve has completed construction of a new dormitory, boathouse, and administrative spaces.

This management plan includes a boundary expansion of 2.2 acres. This land was incorporated with the state nature preserve in 2004 and is subject to all protection afforded by Ohio laws governing state nature preserves. The additional parcel is adjacent to the reserve's southwestern boundary and consists of early successional habitat (e.g., various *Cornus* sp.) and will become an area dominated by mixed hardwoods. Incorporating these lands increases the size of the reserve to 573 acres. The revised management plan is available at: <http://www.oldwomancreek.org>.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Patent Prosecution Highway (PPH) pilot program was originally established between the United States Patent and Trademark Office (USPTO) and the Japan Patent Office (JPO) on July 3, 2006. The USPTO and the JPO agreed at the November 2007 Trilateral Conference to fully implement the PPH program on a permanent basis starting on January 4, 2008.

The USPTO entered into a PPH pilot program with the United Kingdom Intellectual Property Office (UKIPO) on September 4, 2007. Since then, additional PPH pilot programs have

been established between the USPTO and the intellectual property offices of several other countries. Some of the pilot programs, such as those with Japan, Canada, and South Korea, have become permanent.

The PPH program allows applicants whose claims are determined to be patentable in the office of first filing to have the corresponding application that is filed in the office of second filing be advanced out of turn for examination. At the same time, the PPH program allows the office of second filing to exploit the search and examination results of the office of first filing, which increases examination efficiency and improves patent quality. The PCT-PPH pilot program is an expansion to the PPH program based on the framework of the Patent Cooperation Treaty (PCT). Information collected for the PCT is approved under OMB control number 0651-0021.

PPH agreements streamline the patent system by allowing patent examiners to avail themselves of the work product from other participating patent offices. Originally, the PPH program was limited to the utilization of search and examination results of national applications between cross filings under the Paris Convention. The newer PCT-PPH agreements have greatly expanded the potential of the PPH program by permitting participating patent offices to draw upon the positive results of the PCT work product from another participating office. The PCT-PPH pilot program uses international written opinions and international preliminary examination reports developed within the framework of the PCT, thereby making the PPH program available to a larger number of applicants.

The forms in this collection allow participants to file a request in a

corresponding U.S. application and petition to make the U.S. application special under the PPH or PCT-PPH program. The PPH forms collect similar data; however, there is a unique form for each participant. This collection includes forms for these current PPH programs with the USPTO: Japan Patent Office (JPO), United Kingdom Intellectual Property Office (UKIPO), Canadian Intellectual Property Office (CIPO), Danish Patent and Trademark Office (DKPTO), European Patent Office (EPO), Korean Intellectual Property Office (KIPO), Intellectual Property Office of Australia (IPAU), Intellectual Property Office of Singapore (IPOS), German Patent and Trade Mark Office (DPMA), National Board of Patents and Registration of Finland (NBPR), Russian Patent Office (ROSPATENT), Hungarian Patent Office (HPO), Spanish Patent and Trademark Office (SPTO), Austrian Patent Office (APO), and the Mexican Institute of Industrial Property (IMPI). This collection also includes forms for these upcoming PPH programs that are being planned with the USPTO: Israeli Patent Office, State Intellectual Property Office of the P.R.C. (SIPO), Instituto Nacional da Propriedade Industrial (INPI), and the Taiwan Intellectual Property Office (TIPO).

This collection includes forms for these current PCT-PPH pilot programs with the USPTO: EPO, JPO, KIPO, APO, ROSPATENT, SPTO, IPAU, NBPR, the Swedish Patent and Registration Office (PRV), and in U.S. applications where the USPTO was the International Searching Authority (ISA) or International Preliminary Examining Authority (IPEA). This collection also includes forms for these upcoming PCT-PPH pilot programs that are being planned with the USPTO: CIPO, SIPO, and the Nordic Patent Institute (NPI).

II. Method of Collection

Requests to participate in the PPH programs must be submitted online using EFS-Web, the USPTO's Web-based electronic filing system.

III. Data

OMB Number: 0651-0058.

Form Number(s): PTO/SB/20AT/AU/BR/CA/CN/DE/DK, PTO/SB/20EP/ES/FI/HU/IL/JP/KR/MX/RU/SG/TW/UK, and PTO/SB/20PCT-AT/PCT-AU/PCT-CA/PCT-CN/PCT-EP/PCT-ES/PCT-FI/PCT-JP/PCT-KR/PCT-RU/PCT-SE/PCT-US/PCT-XN.

Type of Review: Revision of a currently approved collection.

Affected Public: Individuals or households; businesses or other for-profits; and not-for-profit institutions.

Estimated Number of Respondents: 3,700 responses per year. The USPTO estimates that approximately 10% of these responses will be from small entities.

Estimated Time per Response: The USPTO estimates that it will take the public approximately two hours to gather the necessary information, prepare the appropriate form, and submit a completed request to the USPTO.

Estimated Total Annual Respondent Burden Hours: 7,400 hours.

Estimated Total Annual Respondent Cost Burden: \$2,405,000. The USPTO expects that the information in this collection will be prepared by attorneys. Using the professional rate of \$325 per hour for attorneys in private firms, the USPTO estimates that the total annual respondent cost burden for this collection will be approximately \$2,405,000 per year.
