

placeholder for the final turbidity limit along with a draft set of sampling requirements (see Part 3.3 of the draft CGP), so that if the numeric limit is finalized by February 15, 2012, the numeric limit and the final sampling requirements would be included in the final permit. EPA believes that providing a draft permit with all of the provisions necessary to implement the final limit, even though the final numeric limit is not yet known, provides the public with an adequate opportunity to review and provide comment on sampling requirements that the Agency believes are appropriate for implementing a numeric turbidity limit.

EPA also does not agree with the commenter's suggestion that additional time is needed so that the public may review the draft CGP's sampling requirements with the specific turbidity limit in mind. The specific turbidity limit value will undergo a separate Agency rulemaking effort, including a public notice and comment process dedicated to that rulemaking, which is the proper venue for conducting public review of that limit. As stated previously, EPA would be required to incorporate the final numeric limit in its new permit if it is finalized before EPA's new CGP is issued. See 40 CFR 122.44(a)(1). EPA anticipates that the final value of the turbidity limit can be directly inserted into the CGP without the need to translate the limit further, thus making it unnecessary to have a specific public review of the use of the limit in the permit.

Furthermore, in developing the new CGP's draft sampling requirements, EPA put forward for comment provisions for conducting turbidity monitoring that the Agency views as workable regardless of the value of the final numeric turbidity limit. The sampling requirements in the draft permit reflect EPA's research into the types of requirements that will likely result in measurements that are "representative of the monitored activity" (see 40 CFR 122.41(j)), are reflective of the types of requirements imposed in other similar permits, and were envisioned by EPA in the C&D rule. See III.XIX.A of the preamble to the C&D rule, 74 FR 63047 (December 1, 2009). Although the draft requirements are still undergoing public review, it is important to note that it was EPA's judgment when it issued the draft permit that the draft sampling provisions are appropriate regardless of the final effluent limit. Through the public comment process, EPA will revisit these sampling requirements, as well as the Agency's initial assumptions discussed above, based on comments received. However, at this time, EPA

does not believe that additional time is necessary for the public to review the draft sampling requirements based on the as yet unknown final value of the numeric turbidity limit.

- *The 2008 CGP should be extended further to allow for the Seventh Circuit litigation to play out in full prior to implementing the C&D rule in the new permit.* A few of the commenters suggested that EPA provide for an extension of the 2008 CGP to June 30, 2013 in order to allow for the litigation to come to a final outcome so that the new CGP would presumably reflect any final decision regarding the C&D rule.

EPA does not agree that it is necessary or appropriate to extend the 2008 CGP further to account for the timeline of litigation on the C&D rule. It is difficult to anticipate with any degree of certainty how long this litigation will take, and what the outcome will be, and EPA does not agree that it is appropriate to base its permitting timeline on such a process. EPA believes it is important to issue the new CGP as quickly as possible independent of any litigation schedule. Among other reasons, EPA is interested in issuing the permit in a timely manner so that regulated construction sites, state permitting authorities, and the general public are given the opportunity to see in the near term how the Agency intends to implement its own rule. In EPA's judgment, the February 15, 2012 date for the expiration of the 2008 CGP provides EPA with a sufficient window of time within which to issue the new permit and accomplish this objective.

Product Cancellation Order for Certain Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's order for the cancellations, voluntarily requested by the registrants and accepted by the Agency, of the products listed in Tables 1, 2, and 3 of Unit II, pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This cancellation order follows a May 4, 2011 **Federal Register** Notice of Receipt of Requests from the registrants listed in Table 4 of Unit II. to voluntarily cancel these product registrations. In the May

4, 2011 notice, EPA indicated that it would issue an order implementing the cancellations, unless the Agency received substantive comments within the 30-day comment period that would merit its further review of these requests, or unless the registrants withdrew their requests. The Agency did not receive any comments on the notice. Further, the registrants did not withdraw their requests. Accordingly, EPA hereby issues in this notice a cancellation order granting the requested cancellations. Any distribution, sale, or use of the products subject to this cancellation order is permitted only in accordance with the terms of this order, including any existing stocks provisions.

DATES: The cancellations are effective July 8, 2011.

III. Summary of Public Comments Received and Agency Response to Comments

During the public comment period provided, EPA received no comments in response to the May 4, 2011 **Federal Register** notice announcing the Agency's receipt of the requests for voluntary cancellations of products listed in Tables 1, 2, and 3 of Unit II.

IV. Cancellation Order

Pursuant to FIFRA section 6(f), EPA hereby approves the requested cancellations of the registrations identified in Tables 1, 2, and 3 of Unit II. Accordingly, the Agency hereby orders that the product registrations identified in Tables 1, 2, and 3 of Unit II are cancelled. The effective date of the cancellations that are the subject of this notice is July 8, 2011. Any distribution,

sale, or use of existing stocks of the products identified in Tables 1, 2, and 3 of Unit II. in a manner inconsistent with any of the provisions for disposition of existing stocks set forth in Unit VI. will be a violation of FIFRA.

V. What is the agency's authority for taking this action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be cancelled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the EPA Administrator may approve such a request. The notice of receipt for this action was published for comment

in the **Federal Register** of May 4, 2011 (76 FR 25334) (FRL-8870-5). The comment period closed on June 3, 2011.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action. The existing stocks provisions for the products subject to this order are as follows:

A. Registrations Listed in Table 1 of Unit II Except Nos. 000056-00056 and 000056-00069

The Agency anticipates allowing registrants to sell and distribute existing stocks of these products until July 9, 2012. Thereafter, registrants will be

prohibited from selling or distributing the pesticides identified in Table 1 of Unit II., except for export consistent with FIFRA section 17 or for proper disposal. Persons other than registrants are allowed to sell, distribute, or use existing stocks until such stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled products.

B. Registration Nos. 000056–00056 and 000056–00069

All sale or distribution of existing stocks by the registrants is prohibited after July 8, 2011, except for export consistent with FIFRA section 17 or for proper disposal. Persons other than registrants are allowed to sell, distribute, or use existing stocks until such stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled products.

C. Registrations Listed in Table 2 of Unit II

All sale or distribution of existing stocks by the registrants is prohibited after July 8, 2011, unless that sale or distribution is solely for the purpose of facilitating disposal or export of the products.

Existing stocks may be sold and distributed by persons other than the registrant until November 7, 2011. Existing stocks may be used until exhausted, provided that such use complies with the EPA-approved label and labeling of the products.

D. Registrations Listed in Table 3 of Unit II

Registrants are allowed to sell and distribute existing stocks of these products until January 15, 2012, 1 year after the date on which the maintenance fee was due. Thereafter, registrants will be prohibited from selling or distributing the pesticides identified in Table 3 of Unit II., except for export consistent with FIFRA section 17 or for proper disposal. Persons other than registrants are allowed to sell, distribute, or use existing stocks until such stocks are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled products.
