

following general approaches for implementation:

- Work with each military service to customize actions and needs for guidance;
- Take a phased approach to implement NRC's jurisdiction, including an initial prelicensing/permitting phase to prepare for the licensing/permitting phase;
- Develop phased licensing/permitting jointly with the military services to minimize impact on the schedules for ongoing work;
- Select high priority sites identified by the military to serve as pilot sites to help develop detailed guidance. Also, identify high priority sites where NRC's attention is needed;
- Develop guidance to address questions and cases representative of each military service;
- Include guidance in the Air Force and Navy MML letters of understanding and guidance and similar documents developed for the Army;
- Interact with the Army to establish an appropriate licensing approach and guidance.

Topics where additional guidance could be developed include:

- Application of NRC's decommissioning timeliness requirements;
- Coordination of the military's use of the CERCLA process and NRC's decommissioning process in order to protect the public and the environment and minimize dual regulation; and
- Identification of responsibilities of NRC, Air Force, and Navy under each MML.

SUPPLEMENTARY INFORMATION: On June 15, 2011, DOE published a notice of proposed determination (NOPD) in the **Federal Register** (76 FR 34914) to determine that set top boxes and network equipment meet the criteria for classification as a covered product under the Energy Policy and Conservation Act, as amended (EPCA, 42 U.S.C. 6291, *et seq.*). The NOPD provided for the submission of comments by July 15, 2011. Interested parties requested an extension of the comment period. One commenter stated that it represented over 2000 companies who manufacture set top boxes and similar products, as well as component suppliers and service providers for such products. This commenter stated that it had commissioned a revision of its 2007 energy use study examining power consumption data and trends for set-top boxes and other consumer electronics. The commenter indicated that the data in this study, due in late August 2011, would be helpful to DOE in determining how to proceed with its proposed determination, and that the study would also be helpful informing the comments submitted by the commenter on the proposal. Another commenter requested an extension of time to develop its comments, stating that additional time would allow them to provide better quality comments to DOE. DOE has determined that an extension of the public comment period is appropriate based on the foregoing reasons and is hereby extending the comment period. DOE will consider any comments received by 5 p.m. on September 30, 2011 and deems any comments received between July 15, 2011 and 5 p.m. on September 30, 2011 to be timely submitted.

Further Information on Submitting Comments

DOE will make its own

determination about the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include (1) a description of the items, (2) whether and why such items are customarily treated as confidential within the industry, (3) whether the information is generally known by or available from other sources, (4) whether the information has previously been made available to others without obligation concerning its confidentiality, (5) an explanation of the competitive injury to the submitting person which would result from public disclosure, (6) when such information might lose its confidential character due to the passage of time, and (7) why disclosure of the information would be contrary to the public interest.

Issued in Washington, DC on July 5, 2011.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Office of Technology Development, Energy Efficiency and Renewable Energy.

Airworthiness Directives; Empresa Brasileira de Aeronáutica S.A. (EMBRAER) Model EMB-505 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above. The MCAI describes the unsafe condition as:

It has been found the possibility of free-play between the mass balance weight and the elevator structure. This condition if not corrected could lead to elevator flutter and possible loss of airplane control.

The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.
