Groundfish Fisheries of the EEZ Off Alaska; Pacific Halibut Fisheries; CDQ Program; Bering Sea and Aleutian Islands King and Tanner Crab Fisheries; Recordkeeping and Reporting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this rule to revise recordkeeping and reporting regulations and make other miscellaneous revisions. The revisions include adding a requirement that the Registered Crab Receiver record in eLandings the region in which the stationary floating processor is located at time of crab delivery; standardizing reporting time limits for recording discard, disposition, product, and other required information in the daily fishing logbook, daily cumulative production logbook, eLandings, or the electronic logbook so that the information corresponds with fishing and processing operations; incorporating miscellaneous edits and corrections to regulatory text and tables, including standardizing the use of the terms ''recording,'' ''submitting,'' ''landings,'' and ''landing;'' and reinstating regulations that were inadvertently removed in a previous final rule about locations where NMFS will conduct scale inspections. This action promotes the goals and objectives of the fishery management plans, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws.

DATES: Effective August 10, 2011.

ADDRESSES: Electronic copies of this rule, the Regulatory Impact Review (RIR), and the categorical exclusion memorandum prepared for this action may be obtained from the Alaska Region Web site at *http://alaskafisheries.noaa.gov.*

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this rule may be submitted by mail to NMFS, Alaska Region, P.O. Box 21668, Juneau, AK 99802–1668, *Attn:* Ellen Sebastian, Records Officer; in person at NMFS, Alaska Region, 709 West 9th Street, Room 420A, Juneau, Alaska; and by e-mail to *OIRA_Submission@omb.eop.gov,* or by fax to 202–395–7285.

SUPPLEMENTARY INFORMATION: NMFS manages the U.S. groundfish fisheries of the exclusive economic zone off Alaska under the Fishery Management Plan for Groundfish of the Gulf of Alaska and the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP). With Federal oversight, the State of Alaska manages the commercial king crab and Tanner crab fisheries under the Fishery Management Plan for Bering Sea/Aleutian Islands king and Tanner Crabs. The fishery management plans (FMPs) were prepared by the North Pacific Fishery Management Council and approved by the Secretary of Commerce under authority of the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.* The FMPs are implemented by regulations at 50 CFR parts 679 and 680. General regulations that pertain to U.S. fisheries appear at subpart H of 50 CFR part 600.

Management of the Pacific halibut fisheries in and off Alaska is governed by an international agreement, the ''Convention Between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea,'' (Convention) which was signed in Ottawa, Canada, on March 2, 1953, and was amended by the ''Protocol Amending the Convention,'' signed in Washington, DC, on March 29, 1979. The Convention is implemented in the United States by the Northern Pacific Halibut Act of 1982.

The Interagency Electronic Reporting System, with its data entry component, eLandings, was implemented with a final rule published March 2, 2005 (70 FR 10174), for the Crab Rationalization (CR) Program. The use of eLandings was implemented for groundfish fisheries and the Individual Fishing Quota (IFQ) Program through a final rule published December 15, 2008 (73 FR 76136).

Since implementation and use of eLandings, NMFS has identified minor regulatory changes needed to improve and update the methods and procedures of eLandings, and to improve the flexibility and efficiency of recordkeeping and reporting requirements for NMFS Alaska Region fishery programs.

This final rule revises regulations, as follows:

- Standardizes data entry time limits for recording discard, disposition, product, and other required information in the daily fishing logbook, daily cumulative production logbook, or eLandings to correspond with actual fishing operations.
- Sets time limits for recording information in the paper catcher vessel daily fishing logbooks (DFLs) and mothership and catcher/processor DCPLs.
- Sets time limits to submit landing reports and production reports to NMFS through eLandings.
- Sets time limits to submit electronic logbook (ELB) information through eLandings.
- Revises information to be recorded or submitted ''by noon of the following day'' to read ''by midnight of the following day.''
- Revises ''noon'' and ''midnight'' in Alaska local time (A.l.t.) to read 1200 hours, A.l.t., and 2400 hours, A.l.t., respectively.
- Changes the deadline for a vessel operator's signature entry in the DFLs, DCPLs, and ELBs from noon to midnight.
- Revises the deadline for printing a copy of the ELB logsheet from noon to midnight each day.
- Revises the submittal time limit for the delivery ''landed scale weight'' entry on SSP or SFP eLandings landing reports.
- Revises the time limit to record scale weights in the DCPL for catcher/processors participating in the Central Gulf of Alaska Rockfish Program.
- Revises deadlines for recording scale weights and CDQ group number in the catcher/processor trawl DCPL.
- Removes the requirement to record the date of landing in the SSP or SFP landing report.
- Clarifies extension of time limits for eLandings production reports from SSPs or SFPs not taking deliveries over the weekend.
- Corrects reporting time limit tables for DCPLs and eLandings.
- Adds a requirement that the Registered Crab Receiver record the region in which the stationary floating processor is located at the time of crab delivery.
- Makes non-substantive clarification edits and corrections to regulatory text to include the recording of information in a logbook versus submitting information through eLandings, record information about crew and observers in eLandings, and the correct use of the terms ''landings'' and ''landing.''
- Makes non-substantive clarifications to regulatory tables.
- Removes detailed NMFS mail, fax, and delivery addresses from regulations and replace them with one paragraph stating that the form must be submitted in accordance with instructions on the form.
- Provides separate species codes for Arrowtooth flounder, *Atheresthes stomias,* species code 121, and for Kamchatka flounder, *Atheresthes evermanni,* species code 117.
- Reinstates regulations about scale inspection locations that were inadvertently removed in a previous rule.

These changes are intended to remove inconsistencies in the current regulations describing eLandings. These changes will reduce potential confusion on the part of industry participants, other interested parties, and the public at large. In addition, these changes will reduce costs for processors and Registered Crab Receivers using eLandings. The fishing industry currently uses eLandings to comply with recordkeeping and reporting requirements, so the time and knowledge it takes to complete an eLandings data entry is already established. The entities upon which these changes are imposed are existing registered eLandings users.

These changes will provide benefits, by clarifying eLandings requirements for industry participants and other interested parties, and by increasing the efficiency of the eLandings process. The overall impact on the fishing industry will be increased operational flexibility. There are no economic impacts from these proposed regulatory changes.

NMFS published the proposed rule for this action in the **Federal Register** on February 11, 2011 (76 FR 7788), with a public comment period that closed March 14, 2011. No comments were received during this comment period.

The principal elements of this regulatory amendment are described and explained in detail in the preamble to the proposed rule and are not repeated here.

NMFS made no changes from the proposed rule to the final rule.

Classification

The Administrator, Alaska Region, NMFS, determined that the amendment is necessary for the conservation and management of the BSAI and GOA groundfish fisheries and that it is consistent with the Magnuson-Stevens Fishery Conservation and Management Act and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action will not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the

proposed rule and is not repeated here. No comments were received regarding this certification, and no changes have been made from the proposed rule. As a result, a regulatory flexibility analysis was not required and none was prepared.

Collection-of-Information Requirements

This final rule contains collection-of-information requirements subject to the Paperwork Reduction Act (PRA) and which have been approved by the Office of Management and Budget (OMB). Public reporting burden estimates per response for these requirements are listed by OMB control number.

OMB Control Number 0648–0213

Public reporting burden is estimated to average per response: 18 minutes for catcher vessel trawl gear DFL; 28 minutes for catcher vessel longline or pot gear DFL; 31 minutes for mothership DCPL; 41 minutes for catcher/processor longline or pot gear DCPL; and 30 minutes for catcher/processor trawl gear DCPL or ELB.

OMB Control Number 0648–0515

Public reporting burden is estimated to average per response: 15 minutes for eLandings application processor registration; 35 minutes for eLandings landing report; and 20 minutes for catcher/processor or mothership eLandings production report.

OMB Control Number 0648–0330

Public reporting burden is estimated to average per response: 6 minutes for inspection request for an at-sea scale.

Public reporting estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection-of-information.

Send comments on these or any other aspects of the collection-of-information to NMFS Alaska Region at the **ADDRESSES** above, and e-mail to *OIRA_Submission@omb.eop.gov,* or fax to 202–395–7285.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

(5) * * *

(i) * * *

(B) *Landed scale weight.* The User for a shoreside processor or SFP must record landed scale weight (to the nearest pound) for all retained species from groundfish deliveries by species code and delivery condition code. Obtain actual weights for each groundfish species received and retained by:

(*1*) Sorting according to species codes and direct weighing of that species, or

(*2*) Weighing the entire delivery and then sorting and weighing the groundfish species individually to determine their weights.

* * * * *

(ii) *Submittal time limit.* The User for a shoreside processor or SFP must submit a landing report containing the information described in paragraph (e)(5)(i) of this section for each groundfish delivery from a specific vessel by 1200 hours, A.l.t., of the day following completion of the delivery. If the landed scale weight required in paragraph (e)(5)(i)(C) of this section is not available by this deadline, the User must transmit an estimated weight for each species by 1200 hours, A.l.t., of the day following completion of the delivery, and must submit a revised landing report with the landed scale weight for each species by 1200 hours, A.l.t., of the third day following completion of the delivery.

* * * * *

(6) * * *

(ii) *Submittal time limit.* The User for a mothership must submit a landing report containing the information described at paragraph (e)(6)(i) of this section for each groundfish delivery from a specific vessel by 2400 hours, A.l.t., of the day following the delivery.

* * * * *

(7) * * *

(iii) * * *

(C) *Landing completion.* The User for the Registered Buyer must submit an IFQ landing report, containing the information described in this paragraph (e)(7), within six hours after all IFQ halibut, CDQ halibut, and IFQ sablefish are offloaded from a specific vessel and prior to shipment or transfer of said fish from the landing site.

* * * * *

(8) * * *

(iii) * * *

(B) *Operation type and port code*—(*1*) If a shoreside processor, the port code is pre-filled automatically (see § 679.5(e)(4)).

(*2*) If a catcher/processor, the at-sea operation type is pre-filled automatically.

(*3*) If an SFP and crab delivery is received in port, the at-sea operation type is pre-filled automatically (see § 679.5(e)(4)) and the User must enter the port code from Table 14a to this part.

(*4*) If an SFP and crab delivery is received at sea, the at-sea operation type is pre-filled automatically (see § 679.5(e)(4)) and the User must enter the appropriate crab regional designation (see § 680.40(b)(2)), shown below:

CR CRAB REGIONAL DESIGNATIONS

N—North Region	Landed in the Bering Sea subarea north of 56°20′ N. lat.
S—South Region	Landed in any area in Alaska, not in the North Region.
W—West Region	West of 174° W. long. Only applicable for western Aleutian Islands golden king crab (WAG).

(*2*) Number of observers aboard.

* * * * *

(9) * * *

(ii) *Submittal time limits*—(A) When active pursuant to paragraph (c)(5)(ii) of this section, the User for a shoreside processor or SFP must submit a production report by 1200 hours, A.l.t., each day to record the previous day's production information.

(B) If a shoreside processor or SFP using eLandings is not taking deliveries

over a weekend, the User or manager may submit the eLandings production report from Saturday and Sunday to NMFS by 1200 hours, A.l.t., on the following Monday.

(10) * * *

(iv) *Submittal time limits*—(A) Except as described in paragraph (e)(10)(iv)(B) of this section, when a mothership is active pursuant to paragraph (c)(6)(iv) of this section, a catcher/processor longline or pot gear is active pursuant to paragraph (c)(3)(iv)(B) of this section, or a catcher/processor trawl gear is active pursuant to paragraph (c)(4)(iv)(B) of this section, the User for a mothership or catcher/processor must submit a production report by 2400 hours, A.l.t., each day to record the previous day's production information.

(B) If a vessel is required to have 100 percent observer coverage or more, the User may submit a production report for Friday, Saturday, and Sunday no later than 2400 hours, A.l.t., on the following Monday.

(11) *Printing of landing reports, landing receipts, and production reports*—(i) The User daily must print a paper copy onsite or onboard of:
