Under certain conditions, Section 209(b) of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1719, authorizes the sale and conveyance of the federally owned mineral interests in land to the surface owner or prospective surface owner when the surface is not federally owned and upon payment of administrative costs. The objective is to allow consolidation of the surface and mineral interests when either one of the following conditions exist: (1) There are no known mineral values in the land; or (2) Where continued Federal ownership of the mineral interests interferes with or precludes appropriate non-mineral development and such development is a more beneficial use of the land than mineral development.

Subject to valid existing rights, on July 11, 2011, the federally owned mineral interests in the public lands covered by the application and described above are segregated from appropriation under the public land laws, including the mining laws, while the application is being processed to determine if either of the two specified conditions exist, and to otherwise comply with the procedural requirements of 43 CFR part 2720. The segregative effect of the application shall terminate upon (i) Issuance of a patent or other document of conveyance as to such mineral interests; (ii) Upon final rejection of the application; or (iii) July 11, 2013, whichever occurs first.
