

4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Two Girls Creek Hydroelectric Project (Two Girls Creek Project or project) to be located on Two Girls Creek, near Sweet Home, Linn County, Oregon. The project would occupy in part lands managed by the U.S. Forest Service as part of the Willamette National Forest. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A new 9.5-foot-high, 60-foot-long concrete weir impounding a 6,000-square-foot reservoir with a storage capacity of 1.2 acre-feet; (2) a new 19,365-foot-long buried penstock made up of 30-inch-diameter steel pipe and 36-inch-diameter high-density polyethylene (HDPE) pipe; (3) a new 30-foot by 40-foot concrete block powerhouse containing one Pelton turbine and generator with a capacity of 5.0 megawatts; (4) a new 40-foot-long, 42-inch-diameter HDPE tailrace returning flows to Two Girls Creek above a natural fish barrier; and (5) a new 12-kilovolt, 7.2-mile-long transmission line. The estimated annual generation would be 36.87 gigawatt-hours.

**In what information is EPA particularly interested?**

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

**What should I consider when I prepare my comments for EPA?**

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

**What information collection activity or ICR does this apply to?**

*Affected entities:* Entities potentially affected by this action are State and local governments; local communities and tribes.

*Title:* Clean Water Act State Revolving Fund Program (Renewal)

*ICR numbers:* EPA ICR No. 1391.10, OMB Control No. 2040-0118.

*ICR status:* This ICR is currently scheduled to expire on December 31, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

*Abstract:* The Clean Water Act (CWA), as amended by "The Water Quality Act of 1987" (U.S.C. 1381-1387 *et. seq.*), created a Title VI which authorizes grants to States for the establishment of State Water Pollution Control Revolving Funds (SRF). The information collection activities will occur primarily at the program level through the State "Intended Use Plan" (IUP) and "Annual Report". The information is needed annually to implement Section 606 of the (CWA).

The 1987 Act declares that water pollution control revolving funds shall be administered by an instrumentality of the State subject to the requirements of the act. This means that each State has a general responsibility for administering its revolving fund and must take on certain specific responsibilities in carrying out its administrative duties. The information collection activities will occur primarily at the program level through the State IUP and Annual Report. The information is needed annually to implement section 606 of the Clean Water Act (CWA). The Act requires the information to ensure national accountability, adequate public comment and review, fiscal integrity and consistent management directed to achieve environmental benefits and results. The individual information collections are:

- (1) *Capitalization Grant Application and Agreement/State IUP:* The State will prepare a Capitalization Grant application that includes a State IUP outlining in detail how it will use all of

the funds available to the fund. The grant agreement contains or incorporates by reference the IUP, application materials, payment schedule, and required assurances. The bulk of the information is provided in the IUP, the legal agreement which commits the State and EPA to execute their responsibilities under the Act.

(2) *Annual Report*: The State must agree to complete and submit an Annual Report that indicates how the State has met the goals and objectives of the previous fiscal year as stated in the IUP and grant agreement. The report provides information on loan recipients, loan amounts, loan terms, project categories, environmental benefits and similar data on other forms of assistance. The report describes the extent to which the existing SRF financial operating policies, alone or in combination with other State financial assistance programs, will provide for the long term fiscal health of the Fund and carry out other provisions specified in the grant operating agreement.

(3) *Annual Audit*: Most States have agreed to conduct or have conducted a separate financial audit of the Capitalization Grant which will provide opinions on the financial statements and a report on the internal controls and compliance with program requirements. The remaining States will be covered by audits conducted under the requirements of the Single Audit Act and by EPA's Office of Inspector General.

(4) *Application for SRF Financial Assistance*: Local communities and other eligible entities have to prepare and submit applications for SRF assistance to their respective State Agency which manages the SRF program. The State reviews the completed loan application and verifies that the proposed projects will comply with applicable Federal and State requirements.

*Burden Statement*: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 108 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently

changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

*Estimated total number of potential respondents*: 4,080.

*Frequency of response*: Annually.

*Estimated total average number of responses for each respondent*: 1.

*Estimated total annual burden hours*: 441,405.

*Estimated total annual costs*: \$15,383,300. This includes an estimated burden cost of \$8,856,320 State, and \$6,526,980 Local.

#### **Are there changes in the estimates from the last approval?**

There is an increase of 76,500 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's acceptance of additional loan applicants for the State SRF loan program. The increase in burden hours is the time needed to process and report on these loans on an annual basis.

#### **What is the next step in the process for this ICR?**

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
