

work cooperatively with neighboring jurisdictions related to rehabilitation of the historic scene. In addition, plans detailing how the various landscapes will be managed will be developed prior to the implementation of any rehabilitation activities. The following rehabilitation activities have been identified; the highest priority tasks are listed first:

- Approximately 45 acres of woods along the west side of Chinn Ridge will be cleared and replaced with open fields and grasslands to reestablish the view between the ridge and the site of the New York Monuments.

- Approximately 35 acres of trees will be removed from Matthews Hill and the open fields will be rehabilitated.

- Trees will be thinned at the top of the slope along the east side of the Chinn Ridge to reestablish the view between Chinn Ridge and Henry Hill while minimizing the amount of vegetation removed. The riparian buffer along Chinn Branch will be retained.

- Approximately 15 acres of land on Stuart's Hill that is currently open space will be reforested.

- Approximately 20 acres of land that is currently open space south of Stuart's Hill will be reforested.

- Approximately 20 acres along the north-central portion of Dogan Ridge will be reforested, and a small area of 3 acres along the curve of the Sudley-Manassas Road will be cleared and managed as open fields.

- To the north of the Matthews Hill area, an area of approximately 25 acres will be reforested.

- An additional 5 acres of land along Bull Run to the west of Poplar Ford will be reforested.

- The current Stuart's Hill clearing will be expanded by approximately 30 acres to the east. The clearing will restore the view from General Lee's headquarters toward Centreville during the Second Battle of Manassas.

- The historic landscape around the Cundiff House will be rehabilitated to wartime conditions. Approximately 40 acres of trees will be removed and converted to grassland and/or scrubland.

The NPS will continue to preserve historic structures and features, including those that date from the battles, such as Stone House, L. Dogan House, Thornberry House, and the Unfinished Railroad. Buildings and structures that do not date from the battles, but are historic or mark the site of wartime structures, will be stabilized and rehabilitated to function as important interpretive sites or will be maintained for park uses. These structures include the Brawner Farm

House, Henry House, J. Dogan House, Pringle House, and Stone Bridge.

In addition to continuing to protect these structures, the NPS will initiate several actions:

- Complete work necessary to support year round visitation of the Brawner Farm House as part of the Second Battle of Manassas tour route.

- Explore a range of options to support interpretation of the Robinson House ruins from the Civil War period.

- Preserve and stabilize the J. Dogan House. This preservation effort will include removing nonconforming structural elements such as siding, and removing the nonconforming modern garage.

- As part of the Bypass, the existing U.S. Route 29 Bridge over Bull Run will be removed to eliminate modern intrusions from the battlefield landscape and to return the site to a more historic appearance. In addition, a new bridge will be constructed to allow continued access along U.S. Route 29. The new location will be chosen so there will be fewer impacts to the cultural landscape.

In the selected alternative, a boundary adjustment to the park will be necessary to include the four tracts of land; the Davis Tract, the Stonewall Memory Garden Tract, the Conservation Trust Parcel, and the Dunklin Monument. These tracts are described in detail in the FEIS and in the Record of Decision. This adjustment will require Congressional action to amend the existing boundary.

Implementation of each of these specific actions will require additional site-specific planning and compliance with NHPA and NEPA.

The Preferred Alternative and two other alternatives were analyzed in the Draft Environmental Impact Statement on the General Management Plan (DEIS/GMP) and FEIS/GMP. The full range of foreseeable environmental consequences was assessed, and appropriate mitigating measures were identified.

The Record of Decision includes a statement of the decision made, synopses of other alternatives considered, the basis for the decision, a description of the environmentally preferable alternative, a finding on impairment of park resources and values, a listing of measures to minimize environmental harm, an overview of public involvement in the decision-making process, and comments received on the DEIS/GMP.

Copies of the Record of Decision may be obtained from the contact listed above or online at <http://parkplanning.nps.gov/MANA>.
