At this meeting, the Committee will discuss accountability measures for windowpane flounder, ocean pout, Atlantic halibut, and Atlantic wolffish. The Committee may develop measures that impose gear restrictions on groundfish fishing vessels (both sector and common pool) if annual catch limits for these stocks are exceeded. The Committee will receive a brief overview of the results of recent assessments for Georges Bank yellowtail flounder, Eastern Georges Bank cod, and Eastern Georges Bank haddock. The Committee will identify alternatives for modifying the Georges Bank yellowtail flounder rebuilding strategy in light of the passage of the International Fisheries Agreement Clarification Act. After a review of the accumulation limits workshop held in June 2011, the Committee will develop a scoping document for an amendment to address the issues raised at the meeting. Planning for a sector workshop to be held in October 2011 will also continue. Finally, the Committee will receive a report on progress in developing a method for setting ABCs and ACLs for fishing years 2012-14.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens
