pest. The data sheets include references to the scientific evidence we used in making these determinations.

A complete list of the taxa of plants for planting that we have determined to be quarantine pests or hosts of quarantine pests, along with the data sheets supporting those determinations, may be viewed on the Regulations.gov Web site or in our reading room (see ADDRESSES above for a link to Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the list and data sheets by calling or writing to the person listed under FOR FURTHER INFORMATION CONTACT.

For taxa of plants for planting that are hosts of quarantine pests, the data sheets specify the countries from which the taxon’s importation would not be authorized pending pest risk analysis. In most cases, the importation of the taxa would not be allowed from any country. In some cases, the taxa would be allowed to be imported from Canada. We would allow such importation when Canada is free of the quarantine pest for the taxa in question.

For taxa of plants for planting that are quarantine pests or hosts of quarantine pests, the data sheets include references described in the data sheets to the NAPPRA lists in a subsequent notice. If the Administrator’s determination that the taxa are quarantine pests or hosts of quarantine pests remains unchanged following our consideration of the comments, then we will add the taxa described in the data sheets to the appropriate NAPPRA list.
