Type of Request: Renewal with Revision.

Abstract: The Forest Service contracts with approximately 400 vendors a year for commercial aviation services utilized in resource protection and project management. In recent years, the total annual use of contract aircraft and pilots has exceeded 80,000 hours. In order to maintain an acceptable level of safety, preparedness, and cost-effectiveness in aviation operations, Forest Service contracts include rigorous qualifications for pilots and specific condition, equipment, and performance requirements for aircraft as aviation operations are conducted under extremely adverse conditions of weather, terrain, turbulence, smoke reduced visibility, minimally improved landing areas, and congested airspace around wildfires. To ensure agency contracting officers that pilots and aircraft used for aviation operations meet specific Forest Service qualifications and requirements for aviation operations, prospective contract pilots fill out one of the following Forest Service forms:

- FS-5700-20—Airplane Pilot Qualifications and Approval Record.
- FS-5700-20a—Helicopter Pilot Qualifications and Approval Record. Contract Officers' Technical Representatives use forms:
 - FS-5700-21—Airplane Data Record.
 - FS-5700-21a—Helicopter Data Record.

When inspecting the aircraft for contract compliance. Based upon the approval(s) documented on the form(s), each contractor pilot and aircraft receives an approval card. The Forest Service personnel verify possession of properly approved cards before using contracted pilots and aircraft.

Information collected on these forms includes:

- Name.
- Address.
- Certification numbers.
- Employment history.
- Medical Certification.

- Airplane/helicopter certifications and specifications.
- Accident/violation history.

Without the collected information, Forest Service contracting officers, as well as Forest Service pilot and aircraft inspections, cannot determine if contracted pilots and aircraft meet the detailed qualification, equipment, and condition requirements essential to safe and effective accomplishment of Forest Service specified flying missions.

Without a reasonable basis to determine pilot qualifications and aircraft capability, Forest Service employees would be exposed to hazardous conditions. The data collected documents the approval of contract pilots and aircraft for specific Forest Service aviation missions. Information will be collected and reviewed by contracting officers or their designated representatives, including aircraft inspectors, to determine whether the aircraft and/or pilot(s) meet all contract specifications in accordance with FS Handbook 5709.16, chapter 10, sections 15 and 16. Forest Service pilot and aircraft inspectors maintain the collected information in Forest Service regional offices. The Forest Service, at times, shares the information with the Department of the Interior, Aviation Management Directorate, as each organization accepts contract inspections conducted by the other.
