financial information is reported (form, data input, system-to-system, etc.)

OMB Control No.: 0348–0061.
Form No.: SF–425, SF–425A.
Type of Review: Renewal of a currently approved collection.
Respondents: States, Local
Governments, Universities, Non-Profit Organizations.

Number of Responses: 1,200,000.
Estimated Time per Response: 60
minutes.

Needs and Uses: The SF–425 is used to
collect financial information for
recipients of grants and cooperative
agreements and related transactions
under nonconstruction grant programs.

Debra J. Bond,
Deputy Controller.

NUCLEAR REGULATORY COMMISSION

[Docket No. 04009067; NRC–2008–0339]

Notice of Issuance of Materials License SUA–1597 and Record of Decision for Uranerz Energy Corporation Nichols Ranch In Situ Recovery Project

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of issuance of materials license SUA–1597.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission (NRC or the Commission) has issued a license to Uranerz Energy Corporation (Uranerz) for its Nichols Ranch uranium in situ recovery (ISR) Project in Johnson and Campbell Counties, Wyoming. Materials License SUA–1597 authorizes Uranerz to operate its facilities as proposed in its license application, as amended, and to possess uranium source and byproduct material at the Nichols Ranch ISR Project. Furthermore, Uranerz will be required to operate under the conditions listed in Materials License SUA–1597.

This notice also serves as the record of decision for the NRC decision to approve Uranerz’s license application for the Nichols Ranch facility and issue Materials License SUA–1597. This record of decision satisfies the regulatory requirement in Section 51.102(a) of Title 10 of the Code of Federal Regulations (10 CFR), which requires a Commission decision on any action for which a final environmental impact statement has been prepared to be accompanied by or include a concise public record of decision.

The NRC considers the entire publicly available record for a license application to constitute the agency’s record of decision. Documents related to the application carry docket number 04009067. These documents for the Nichols Ranch ISR Project include the license application (including the applicant’s environmental report) (ML080080600), the Commission’s Safety Evaluation Report (SER) published in July 2011 (ML102240206) and the Commission’s Final Supplemental Environmental Impact Statement (FSEIS) (NUREG–1910, Supplement 2) published in January 2011 (ML103440120). The record of decision also includes the applicable portions of the Generic Environmental Impact Statement for In Situ Leach Uranium Milling Facilities (NUREG–1910) as incorporated by reference in the FSEIS. As discussed in the Nichols Ranch FSEIS, the Commission considered a range of alternatives. The reasonable alternatives discussed in detail were the applicant’s proposal as described in its license application to conduct in-situ uranium recovery on the site and the no-action alternative. Other alternatives considered but eliminated from detailed analysis include conventional uranium mining and milling, conventional mining and heap leach processing, alternative site location, alternate leachants, and alternate wastewater treatment methods. The factors considered when evaluating the alternatives, discussion of preferences among the alternatives, and license conditions and monitoring programs related to mitigation measures are also discussed in the Nichols Ranch FSEIS. The FSEIS also contained the NRC staff recommendation to the Commission, related to the environmental aspects of the proposed action that the source material license should be issued as requested, unless safety issues mandate otherwise.

The NRC has found that the application for the source materials license complied with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s regulations. As required by the Act and the Commission’s regulations, the staff has found that Uranerz is qualified by reason of training and experience to use source material for the purpose it requested and Uranerz’s proposed equipment and procedures for use at its Nichols Ranch Project are adequate to protect public health and minimize danger to life or property. The NRC staff’s review supporting these findings is documented in the SER. The NRC staff also concluded, in accordance with 10 CFR 40.32(d), that issuance of Materials License SUA–1597 to Uranerz will not be inimical to the common defense and security or to the health and safety of the public. The staff also found in accordance with 10 CFR 40.32(e), after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, that the action called for is the issuance of License Amendment No. 1 to Materials License SUA–1597.

Uranerz’s request for a materials license was previously noticed in the Federal Register on June 16, 2008 (73 FR 34052), with a notice of an opportunity to request a hearing. The NRC did not receive any requests for a hearing on the license application.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 2.390 of the NRC’s “Rules of Practice,” the details with respect to this action, including the SER and accompanying documentation and license, are available electronically at the NRC’s Electronic Reading Room at http://www.nrc.gov/reading-rm/ adams.html. From this site, you can access the NRC’s Agencywide Document Access and Management System (ADAMS), which provides text and image files of the NRC’s public documents. BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

PSEG Nuclear LLC, Hope Creek Generating Station; Notice of Issuance of Renewed Facility Operating License No. NPF–57 for an Additional 20-Year Period; Record of Decision

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Renewed Facility Operating License No. NPF–57 to PSEG Nuclear LLC (licensee), the operator of the Hope Creek Generating Station (HCGS). Renewed Facility Operating License No. NPF–57 authorizes operation of HCGS by the licensee at reactor core power levels not in excess of 3,840 megawatts thermal in accordance with the provisions of the HCGS renewed license and its technical specifications.

The notice also serves as the record of decision for the Renewal of Facility Operating License No. NPF–57, consistent with Title 10 of the Code of Federal Regulations Section 51.103 (10 CFR 51.103). As discussed in the final supplemental environmental impact statement (FSEIS) for HCGS and Salem Nuclear Generating Station (Salem), Units 1 and 2, dated March 2011, the Commission has considered a range of reasonable alternatives that included coal fired generation, natural gas combined-cycle generation, combined alternative, and the no-action alternative. The factors considered in the record of decision can be found in the FSEIS published in March 2011 as NUREG–1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants, Supplement 45, Regarding Hope Creek Generating Station and Salem Nuclear Generating Station, Units 1 and 2.”

HCGS is a boiling water reactor located in Lower Alloways Creek Township, Salem County, New Jersey. The application for the renewed license complied with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s regulations. As required by the Act and the Commission’s regulations in 10 CFR Chapter I, the Commission has made appropriate findings, which are set forth in the license. Prior public notice of the action involving the proposed issuance of the renewed license and an opportunity for a hearing regarding the proposed issuance of the renewed license was published in the Federal Register on October 23, 2009 (74 FR 54856).

For further details with respect to this action, see: (1) PSEG Nuclear LLC’s license renewal application for Hope Creek Generating Station dated August 18, 2009, as supplemented by letters dated through May 19, 2011; (2) the Commission’s safety evaluation report (NUREG–2102), published in June 2011; (3) the licensee’s updated safety analysis report; and (4) the Commission’s final environmental impact statement (NUREG–1437, Supplement 45), for the Hope Creek Generating Station and Salem Nuclear Generating Station, Units 1 and 2, published in March 2011. These documents are available at the NRC’s Public Document Room, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852, and can also be obtained from the NRC Public Electronic Reading Room at http://www.nrc.gov/reading-rm/adams.html.

Copies of renewed Facility Operating License No. NPF–57 (ADAMS Accession No. ML11116A197) may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Director, Division of License Renewal. Copies of the Hope Creek Generating Station safety evaluation report (NUREG–2102) and the final environmental impact statement (NUREG–1437, Supplement 45) may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161 (http://www.ntis.gov), 703–605–6000, or Attention: Superintendent of Documents, U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250–7954 (http://www.gpoaccess.gov), 202–512–1800. All orders should clearly identify the NRC publication number and the requestor’s Government Printing Office deposit account number or VISA or MasterCard number and expiration date.

Dated at Rockville, Maryland, this 20th day of July, 2011.

For the Nuclear Regulatory Commission.

Brian E. Holian, Director, Division of License Renewal, Office of Nuclear Reactor Regulation.

POSTAL REGULATORY COMMISSION

[Docket No. A2011–25; Order No. 767]

Post Office Closing

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: This document informs the public that an appeal of the closing of the Unionville, Iowa post office has been filed. It identifies preliminary steps and provides a procedural schedule. Publication of this document will allow the Postal Service, petitioners, and others to take appropriate action.

DATES: Administrative record due (from Postal Service): August 5, 2011; deadline for notices to intervene: August 16, 2011. See the Procedural Schedule in the SUPPLEMENTARY INFORMATION section for other dates of interest.

ADDRESSES: Submit comments electronically by accessing the “Filing Online” link in the banner at the top of this Commission’s Web site (http://www.prc.gov) or by directly accessing the Commission’s Filing Online system.
