It includes guidance on selecting appropriate models for a given fire scenario and on understanding the levels of confidence that can be attributed to the model results. In addition, the report discusses the features and limitations of the five fire models documented in NUREG-1824 (EPRI 1011999), "Verification & Validation of Selected Fire Models for Nuclear Power Plant Applications." The report also will form the foundation for future fire model training being developed by RES and EPRI.

The first draft of NUREG-1934 was released in December 29, 2009, for a 60-day public comment period (74 FR 68872). Numerous comments were received, and they have been addressed in this second draft. Because of the extensive interest generated by the first public comment period, the revised draft is being issued for an additional 30-day public comment period.
