

PM10 Attainment/Maintenance Plan Telluride Attainment/Maintenance Area” for adequacy review on EPA’s transportation conformity Web site on November 22, 2010. The public

comment period closed on December 22, 2010, and we did not receive any comments in response to the adequacy review posting (see <http://www.epa.gov/>

[otaq/stateresources/transconf/cursrips.htm#telluride](http://www.epa.gov/otaq/stateresources/transconf/cursrips.htm#telluride)).

The MVEBs we found adequate are presented in the following table:

Area of applicability	CO emissions (tons per day)	2020 PM ₁₀ emissions (pounds per day)	2021 PM ₁₀ emissions (pounds per day)
Colorado Springs (CO)	N/A ¹
Greeley (CO)	N/A ¹
Cañon City (PM ₁₀)	1613
Pagosa Springs (PM ₁₀)	946
Telluride (PM ₁₀)	1108

¹ LMP area—no MVEB required. Prior MVEBs may apply, as described in our adequacy letters to the State.

Please note that our adequacy review described above is separate from our rulemaking action on the five maintenance plans discussed above and should not be used to prejudge our ultimate approval or disapproval of each of the SIP revisions. Even if we find a maintenance plan or a maintenance plan and its MVEB adequate for transportation conformity purposes, we may later disapprove the SIP revision.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 25, 2011.

James B. Martin,

Regional Administrator, Region 8.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-RCRA-2011-0178; FRL-9446-9]

EPA Seeking Input Materials Measurement; Municipal Solid Waste (MSW), Recycling, and Source Reduction Measurement in the U.S.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is soliciting stakeholder input regarding the efficacy and scope of the MSW Characterization Report called “Municipal Solid Waste in the United States” as part of a broader discussion about sustainable materials management. This information will be used to develop new measurement definitions and protocols for measurement of these materials, as well as the possible addition of construction and demolition (C&D) materials and non-hazardous industrial materials to the list of materials addressed in future efforts. This effort could lead to the creation of a new measurement report that the U.S. Environmental Protection Agency (EPA or the Agency) will make publicly available.

DATES: All written comments must be received on or before August 31, 2011.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-RCRA-2011-0178 by one of the following methods:

- <http://www.regulations.gov>. Follow the online instructions for submitting comments using the Docket ID No. EPA-HQ-RCRA-2011-0178.
- E-mail: rcra-docket@epa.gov.
- Fax: 202-566-9744.
- Mail: RCRA Docket (28221T), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.

• **Hand Delivery:** EPA West Building Room 3334, 1301 Constitution Avenue, NW., Washington, DC 20460. Such deliveries are only accepted during the Docket’s normal hours of operation (8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays) and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-HQ-RCRA-2011-0178. EPA’s policy is that all comments received will be included in the docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The <http://www.regulations.gov> Web site is an “anonymous access” system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you

include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA’s public docket, visit the EPA Docket Center homepage at <http://www.epa.gov/dockets/>.

Docket: All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at the RCRA Docket, EPA/DC, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC 20460. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the RCRA Docket is (202) 566-0270.

FOR FURTHER INFORMATION CONTACT: Hope Pillsbury, Mail Code (5306P), Office of Resource Conservation and Recovery, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; *telephone number:* (703) 308-7258; *pillsbury.hope@epa.gov*.

SUPPLEMENTARY INFORMATION:

Background

For decades, EPA has been providing information on the recycling, reuse and generation of municipal solid waste

(MSW) in its regularly published MSW Characterization Report called "Municipal Solid Waste in the United States." Our trash or MSW is made up of the things we commonly use and then throw away. These materials include items, such as packaging, food scraps, grass clippings, sofas, computers, and refrigerators. EPA has used this report to provide a consistent view of MSW in the US over time and for internal performance measures, deliberations and programmatic assessments; however questions are being raised about its scope, the data sources used, the assumptions made, as well as its transparency. There is also a growing need for a more holistic assessment of how materials are generated, used and managed in the U.S. economy.

While the structure, content and methodology of the MSW Characterization Report has remained essentially unchanged, the manner in which the report is used has changed dramatically, and it is now used as the basis for decisions that were unanticipated when the report was first conceived. Many believe that the data and conclusions provided in the MSW Characterization Report do not adequately support this expanded scope of use.

EPA is interested in obtaining stakeholder input regarding the Agency's methods of measuring materials in the following waste streams: MSW (which can include items, such as packaging, food scraps, grass clippings, sofas, computers, and refrigerators), construction and demolition (C&D) materials, and non-hazardous industrial materials (such as iron and steel slags, spent foundry sands, and pulp and paper residues); and the sustainable management of these materials through safe recycling and source reduction. The Agency will consider the information gathered from this notice and other sources as it works to create a new national measurement approach and report. Our goal is to produce a measurement approach and resulting report that provides appropriate data to support a broad array of uses, including recycling, source reduction and waste prevention, and disposal.

EPA's MSW Characterization Report, "Municipal Solid Waste in the United States," analyzes, among other things, the amounts of MSW recycled, incinerated and landfilled. This document can be found at: <http://www.epa.gov/epawaste/nonhaz/municipal/msw99.htm>. This report has been based on a materials flow approach, which is a top-down approach to measurement. It

characterizes the MSW stream of the nation as a whole. The report is the result of modeling that uses data gathered from a wide variety of public and private sources, such as the Department of Commerce, the U.S. Census Bureau, and trade associations. This method, however, has limitations, including the fairly narrow scope of materials it covers and inherent limitations due to a modeling approach. For example, at present, it does not include other types of non-hazardous waste, such as C&D materials, industrial materials and automotive waste.

Other measurement efforts in the solid waste area that EPA has undertaken involved electronics and C&D materials. The electronics study (with a more detailed assessment of used and end of life of electronics) called "*Electronics Waste Management in the United States: Approach One*," can be found at: <http://www.epa.gov/osw/conserves/materials/ecycling/manage.htm>. EPA conducted two C&D studies. The most recent study was "*Building-Related Construction and Demolition Materials Amounts*," to determine the amount of building-related C&D materials generated and recovered in the U.S. during 2003. That study can be found at <http://www.epa.gov/osw/conserves/rrr/imr/cdm/pubs/cd-meas.pdf>.

EPA also issued a report in 1997 that established voluntary recycling measurement standards with an extensive list of definitions. It can be found at: <http://www.epa.gov/osw/conserves/tools/recmeas/>.

Furthermore, State and local communities have also developed ways of measuring their recycling rates based on a somewhat different scope of materials included, and occasionally, different definitions of recycling so that they could meet their own legislatively mandated recycling or diversion goals. As the Agency considers a broader and more comprehensive view of sustainable materials management, EPA seeks input on how these other non-hazardous wastes and materials should be measured and characterized, as well as input on what definitions should be used.

The Agency is considering various approaches to data gathering and reporting and seeks stakeholder input on the following topics:

Topic 1: Usage of EPA's Characterization Report

If you use EPA's MSW Characterization Report:

- How do you use it?

- What decisions or actions have you taken or plan to take based upon this report?

- What do you like and dislike?
- How would you improve it?
- Recognizing that data gathering is crucial to any characterization report, do you have suggestions, based on experience with similar data gathering efforts, on what has worked, and what has not, in those efforts?

Topic 2: Scope of EPA's MSW Characterization Report

The current MSW Characterization Report shows what products and materials are commonly collected and disposed of by households. Examples of this include paper, glass, metal, plastic, textiles and wood plus organics (food, leaves and grass). All these materials are generated by residential and commercial sectors and are presently recycled, reused, combusted or landfilled. In considering the scope of the report and possible improvements, please consider the following questions:

- What materials should be included in the report (in particular, should it include other types of non-hazardous waste, such as C&D materials, industrial materials, and/or automotive waste)?
- What are the most useful sources of data?
- Who should provide this data?
- Consistent terminology is crucial for successful measurement and reporting. Thus, please list primary materials terms used in your field. For purposes of measuring, what terms are most important, and how would you define them? Examples of terms to be considered include: Reuse; source reduction; recycling; pre-consumer recycling; post-consumer recycling; disposal; biomass; organics; municipal solid waste; industrial (nonhazardous) solid waste; recycled material terms (e.g., iron and steel scrap, other metals, paper fiber) sustainability; C&D materials; and zero waste.

Topic 3: Measurement Methodology

In making assessments on the methods to be used for measurement, please provide your insights to the following questions.

- What types of data gathering and analyses are likely to be most accurate and lead to clearly understandable results?
- Are the voluntary recycling standards and definitions EPA established in 1997 applicable or useful today? Please explain why or why not.
- If an open source, transparent Web-based data collection and measurement tool could be created, would you use it?

How practical and economical would such a system be?

- In determining the measurement of materials throughout their entire life cycle from resource extraction; material processing; product design and manufacturing; product use; collection and processing; to disposal:
 - What data collection would be needed?
 - What kind of measurement methodology and tools are necessary?
 - What reporting framework would support your programmatic efforts?

List of Subjects

Environmental protection, municipal solid waste (MSW) characterization, MSW management, recycling, measurement, data, data collection, construction and demolition (C&D) recycling, source reduction, life cycle, life cycle systems approach, sustainable materials management.

Dated: July 27, 2011.

Suzanne Rudzinski,

Director, Office of Resource Conservation and Recovery, Office of Solid Waste and Emergency Response.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: The Federal Communications Commission (FCC), as part of its continuing effort to reduce paperwork burdens, invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act (PRA) of 1995. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) ways to further reduce the

information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before October 3, 2011. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to the Federal Communications Commission via e-mail to PRA@fcc.gov and Cathy.Williams@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0906.
Title: 47 CFR 73.624(g), FCC Form 317.

Form Number: FCC Form 317.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for profit entities; not for profit institutions; State, local or Tribal government.

Number of Respondents and Responses: 9,391 respondents; 18,782 responses.

Estimated Hours per Response: 2-4 hours.

Frequency of Response: Recordkeeping requirement; annual reporting requirement; one time reporting requirement.

Total Annual Burden: 56,346 hours.

Total Annual Cost: \$1,408,650.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in Sections 154(i), 301, 303, 336 and 403 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Act Assessment: No impact(s).

Needs and Uses: On July 15, 2011, the Commission adopted the Second Report and Order, In the Matter of Amendment of Parts 73 and 74 of the Commission's Rules to Establish Rules for Digital Low Power Television Translator, and Television Booster Stations and to Amend Rules for Digital Class A Television Stations, MB Docket No. 03-

185, FCC 11-110 ("LPTV Digital Second Report and Order"). The LPTV Digital Second Report and Order contains rules and policies for low power stations ("LPTV") to transition from analog to digital broadcasting and states that low power television, TV translator, and Class A television stations operating pursuant to Special Temporary Authority (STA) must comply with the requirements for feeable ancillary or supplementary services in Section 73.624(g) (using FCC Form 317). This requirement is being submitted to the Office of Management and Budget (OMB) for review and approval.

OMB Control Number: 3060-0386.

Title: Special Temporary Authorization (STA) Requests; Notifications; and Informal Filings; Sections 1.5, 73.1615, 73.1635, 73.1740, and 73.3598; CDBS Informal Forms; Section 74.788; Low Power Television, TV Translator and Class A Television Digital Transition Notifications; FCC Form 337.

Form Number: FCC Form 337.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for profit entities; not for profit institutions; State, local or Tribal government.

Number of Respondents and Responses: 6,509 respondents; 6,509 responses.

Estimated Hours per Response: 0.5 to 4 hours.

Frequency of Response: On occasion reporting requirement; one time reporting requirement.

Total Annual Burden: 5,325 hours.

Total Annual Cost: \$2,126,510.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this information collection is contained in Sections 1, 4(i) and (j), 7, 301, 302, 303, 307, 308, 309, 312, 316, 318, 319, 324, 325, 336 and 337 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Act Assessment: No impact(s).

Needs and Uses: On July 15, 2011, the Commission adopted the Second Report and Order, In the Matter of Amendment of Parts 73 and 74 of the Commission's Rules to Establish Rules for Digital Low Power Television Translator, and Television Booster Stations and to Amend Rules for Digital Class A Television Stations, MB Docket No. 03-185, FCC 11-110 ("LPTV Digital Second Report and Order"). The LPTV Digital Second Report and Order contains rules and policies for low power stations ("LPTV") to transition from analog to
