

elevated levels of sound as a result of permitted fireworks displays, as well as increased human activity associated with those displays. Because the specified activities have the potential to take marine mammals present within the action area, MBNMS requests authorization to take, by Level B harassment only, California sea lions (*Zalophus californianus*) and harbor seals (*Phoca vitulina*).

Specified Activities

Since 1993, the MBNMS, a component of NOAA's Office of National Marine Sanctuaries, has processed requests for the professional display of fireworks that affect the sanctuary. The MBNMS has determined that debris fallout (i.e., spent pyrotechnic materials) from fireworks events may constitute a discharge into the sanctuary and thus violate sanctuary regulations, unless a permit is issued by the superintendent. Therefore, sponsors of fireworks displays conducted in the MBNMS are required to obtain sanctuary authorization prior to conducting such displays (see 15 CFR 922.132).

Authorization of professional firework displays has required a steady refinement of policies and procedures related to this activity. Fireworks displays, and the attendant increase in human activity, are known to result in the behavioral disturbance of pinnipeds, although there is no known instance of this disturbance resulting in more than temporary abandonment of haul-outs. As a result, pinnipeds hauled out in the vicinity of permitted fireworks displays may exhibit behavioral responses that indicate incidental take by Level B harassment under the MMPA. Numbers of California sea lions and harbor seals, the species that may be subject to harassment, have been recorded extensively at four regions where fireworks displays are permitted in MBNMS.

From 1993 through 2010, MBNMS has issued 87 permits for professional fireworks. However, the MBNMS staff projects that as many as 20 coastal displays per year may be conducted in, or adjacent to, MBNMS boundaries in the future. Thus, the number of displays would be limited to not more than 20 events per year in four specific areas along 276 mi (444 km) of coastline. Fireworks displays would not exceed 30 minutes (with the exception of up to two displays per year, each not to exceed one hour) in duration and would occur with an average frequency of less than or equal to once every 2 months within each of the four prescribed display areas. NMFS believes—and extensive monitoring data indicates—that incidental take resulting from fireworks displays causes, at most, the short-term flushing and evacuation of non-breeding haul-out sites by California sea lions and harbor seals.

MBNMS' four designated display areas include Half Moon Bay, the Santa Cruz/Soquel area, the northeastern Monterey Peninsula, and Cambria (Santa Rosa Creek). This effectively limits permitted fireworks displays to approximately five percent of the MBNMS coastline.

A more detailed description of the fireworks displays permitted by MBNMS may be found in MBNMS' application, in MBNMS' Assessment of Pyrotechnic Displays and Impacts within the MBNMS 1993–2001 (2001), or in the report of Marine Mammal Acoustic and Behavioral Monitoring for the MBNMS Fireworks Display, 4 July 2007 (2007), which are available at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm>.

Information Sought

Interested persons may submit information, suggestions, and comments concerning MBNMS's request (see **ADDRESSES**). All information, suggestions, and comments related to

MBNMS's request and NMFS' potential development and implementation of regulations governing the incidental taking of marine mammals by MBNMS will be considered by NMFS in developing, if appropriate, regulations governing the issuance of letters of authorization.

POLICY JUSTIFICATION
Poland—Service Life Extension Program for ex-FFG-7 Class Frigates
The Government of Poland has requested a possible sale to provide follow-on technical support and a

Service Life Extension Program for the upgrade and conversion of MK15 PHALANX Close-In Weapon Systems (CIWS) aboard two ex-FFG-7 Class Frigates from the Block 0 to Block 1B, Baseline 2 configuration, spare and repair parts, support and test equipment, publications and technical documentation, system overhauls and upgrades, personnel training and training equipment, U.S. Government and contractor technical support, and other related elements of program support. The estimated cost is \$200 million.

Poland is one of our important allies in Northern Europe, contributing to NATO activities and ongoing U.S. interests in the pursuit of peace and stability. Poland's efforts in peacekeeping operations in Iraq and Afghanistan have served U.S. national security interests. It is vital to the U.S. national interest to assist Poland to develop and maintain a strong and ready self-defense capability.

The proposed sale will improve Poland's capability to meet current and future operational needs. Poland already has the capability to maintain the current Frigates and will have no difficulty absorbing the upgraded shipboard systems into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The proposed sale will involve multiple contractors, as well as U.S. Atlantic Coast shipyards who will compete for planning and execution of the system overhaul and upgrade projects. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Poland. However, periodic travel to Poland will be required on a temporary basis in conjunction with program, technical, and management oversight and support requirements.

There will be no adverse impact on the U.S. defense readiness as a result of this proposed sale.
