

is seeking OMB approval for an extension (no change in the reporting and/or recordkeeping requirements) of this information collection. The Commission is reporting a 850 hour increase adjustment in burden which is due to the addition of a respondent not included in prior ARMIS Report 43-05 review process.

The USOA Report provides the annual results of the carriers' activities for each account in the Uniform System of Accounts.

The Service Quality Report provides service quality information in the areas of interexchange access service, installation and repair intervals, local service installation and repair intervals, trunk blockage, and total switch downtime for price cap carriers.

The Infrastructure Report provides the switch deployment and capabilities data.

The information contained in the three reports provides the necessary detail to enable this Commission to fulfill its regulatory responsibilities. Automated reporting of these data greatly enhances the Commission's ability to process and analyze the extensive amounts of data it needs to administer its rules. ARMIS facilitates the timely and efficient analysis of revenue requirements, rates of return and price caps, and provides an improved basis for auditing and other oversight functions. It also enhances the Commission's ability to quantify the effects of policy proposals.
