Type of Request: New collection of Information.

Abstract: The Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2010 (Pub. L. 111-80) provides the Food and Nutrition Service (FNS) with funds to test the

effectiveness of pilot projects designed to increase elderly participation in the Supplemental Nutrition Assistance Program (SNAP; formerly known as the Food Stamp Program). Historically, elderly individuals who are eligible for SNAP have the lowest participation rates among all demographic groups. The pilot projects will attempt to increase participation in SNAP among beneficiaries of Medicare's Extra Help by using data from Extra Help applications that are forwarded to State Medicaid offices. Because Extra Help and SNAP eligibility requirements do not directly correspond, these pilot projects will evaluate methods of using these Medicaid data to increase SNAP participation among Extra Help beneficiaries.

FNS invited State agencies to submit grant applications to use data from the Extra Help program to reduce the barriers to SNAP participation experienced by Extra Help applicants. FNS is funding three pilot projects to address some of these challenges through three approaches: (1) Targeted outreach in Washington, (2) simplified eligibility criteria in Pennsylvania, and (3) standardized SNAP benefits in New Mexico.

The overarching goal of the evaluation is to understand how the pilot programs operated, who they served, and the extent to which they generated any measurable effects on participation, cost, and SNAP benefits. As part of the evaluation, FNS will (1) Obtain a detailed description of each pilot project; (2) obtain a detailed description of the implementation process of each pilot project; (3) assess the effect of each pilot project on SNAP participation among the target population; (4) assess the effect of each pilot project on SNAP benefits; (5) assess the federal, State, and local administrative costs of each pilot project, including both implementation costs and operational costs; (6) assess the overall pilot experience among SNAP participants and non-participants within the target group; (7) assess the effect of each pilot project on SNAP case and payment errors; (8) assess the sustainability of each pilot project and the prerequisites for statewide expansion, including describing administrative barriers that may hinder replication of the pilot projects, and (9) assess and compare the relative promise of alternative models.

The information collection being requested for this project is to address the assessment of overall pilot experience among SNAP participants and eligible non-participants (objective 6 above). In order to accomplish this, the evaluation will solicit feedback from

participants and non-participants through a 20-minute telephone survey and through 60-minute focus groups in order to better understand the client experience with SNAP in general and the pilot project more specifically. In pilot locations, the evaluation will also ask about respondents' impressions of the pilot initiative.

Affected Public: Individuals/ Households.

Respondent Type: SNAP participants and eligible non-participants in States with a pilot project.

Estimated Number of Respondents: The total estimated number of sample members to the survey is 6,000. This includes 1,000 individuals in New

Mexico, 2,000 in Washington, and 3,000 in Pennsylvania. The total estimated number of respondents to the survey is 4,803, or 80% of the sample in each State (85% of the participant sample and 75% of the nonparticipant sample). The total estimated number of sample members to the focus group is 138. The total number of focus group participants is 110, or 80% of the focus group sample in each State. This includes two groups with 10 people each in Pennsylvania, five groups with 10 people each in Washington, and four groups with 10 people each in New Mexico.

Estimated Number of Responses per Respondent: For the survey, there will

be one interview per SNAP participant or nonparticipant. Participants in the focus groups will only participate once. The focus group participants in each State will be recruited from the survey sample in that State.

Estimated Time per Response: The estimated average response time is 20 minutes for the survey and 60 minutes to participate in the focus group.

Estimated Total Annual Burden on Respondents: The total estimated response time is 1,659.25 hours for the survey and 111.40 hours for the focus groups, for a total of 1,770.65 hours. See the table below for estimated total annual burden.

State	Respondent type	Type of instrument		Estimated number of respondents	Frequency of responses	Estimated total annual responses	Time per respondent (hours)	Annual burden hours
