

projector, such as maximum image size, color characteristics, factory pre-set timings, and frequency range limits. We find that the assembly and programming operations performed in Taiwan are sufficiently complex and meaningful so as to create a new article with a new character, name and use. *See, for e.g.*, HQ H034843 and H100055. Moreover, we note that some of the Chinese modules were made using Taiwanese parts. Through the operations undertaken in Taiwan, the individual parts lose their identities and become integral to the new and different article, i.e., the projector. *See Belcrest Linens*. Accordingly, we find that the country of origin of the projector is Taiwan.

HOLDING:

Based on the facts in this case, we find that the assembly and programming operations performed in Taiwan substantially transform the non-TAA country components of the projector. Therefore, the country of origin of the Model A and Model B projectors is Taiwan for purposes of U.S. government procurement.

Notice of this final determination will be given in the **Federal Register**, as required by 19 C.F.R. § 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 C.F.R. § 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 C.F.R. § 177.30, any party-at-interest may, within 30 days of publication of the **Federal Register** Notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,
