The Springfield Science Museum is requesting a permit to continue enhancement activities previously authorized under Permit No. 1555. Activities would include the acquisition of up to five captive-bred, non-releasable shortnose sturgeon. The display would be used to increase public awareness of the shortnose sturgeon and its status by educating the public on shortnose sturgeon life history and the reasons for the species decline. The proposed project to display endangered cultured shortnose sturgeon responds directly to a recommendation from the NMFS recovery plan outline for this species. The permit would not authorize any takes from the wild, nor would it authorize any release of captive sturgeon into the wild. The permit is requested for a duration of five years.
