SUPPLEMENTARY INFORMATION:

Title: Agricultural Resources Management Survey and Chemical Use Surveys.

OMB Control Number: 0535–0218.

Expiration Date of Approval: December 31, 2011.

Type of Request: Intent to revise and extend a currently approved information collection for a period of three years.

Abstract: The Agricultural Resource Management Surveys (ARMS) are the primary source of information for the U.S. Department of Agriculture on a broad range of issues related to: Production practices, costs and returns, pest management, chemical usage, and contractor expenses. Data is collected on both a whole farm level and on selected commodities.

ARMS is the only source of information available for objective evaluation of many critical issues related to agriculture and the rural economy, such as: Whole farm finance data, including data sufficient to construct estimates of income for farms by type of operation, loan commodities, income for operator households, credit, structure, and organization; marketing information, and other economic data on input usage, production practices, and crop substitution possibilities. Data from ARMS are used to produce estimates of net farm income by type of commercial producer as required in 7 U.S.C. 7998 and estimates of enterprise production costs as required in 7 U.S.C. 1441(a). Data from ARMS are also used as weights in the development of the Prices Paid Index, a component of the Parity Index referred to in the Agricultural Adjustment Act of 1938. These indexes are used to calculate the annual Federal grazing fee rates as described in the Public Rangelands Improvement Act of 1978 and Executive Order 12,548 and as promulgated in regulations found at 36 CFR 222.51.

In addition, ARMS is used to produce estimates of sector-wide production expenditures and other components of income that are used in constructing the estimates of income and value-added
