### National Oceanic and Atmospheric Administration

#### Proposed Information Collection; Comment Request; Northwest Region Vessel Identification Requirements

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before October 21, 2011.

**ADDRESSES:** Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at [dHynek@doc.gov](mailto:dHynek@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument and instructions should be directed to Becky Renko, (206) 526-6110 or [becky.renko@noaa.gov](mailto:becky.renko@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

## I. Abstract

The success of fisheries management programs depends significantly on regulatory compliance. The vessel identification requirement is essential to facilitate enforcement. The ability to link fishing or other activity to the vessel owner or operator is crucial to enforcement of regulations issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. A vessel's official number is required to be displayed on the port and starboard sides of the deckhouse or hull, and on a weather deck. It identifies each vessel and should be visible at distances at sea and in the air. Vessels that qualify for particular fisheries are readily identified, gear violations are more readily prosecuted, and this allows for more cost-effective enforcement. Cooperating fishermen also use the number to report suspicious activities that they observe. Regulation-compliant fishermen ultimately benefit as unauthorized and illegal fishing is deterred and more burdensome regulations are avoided.

## II. Method of Collection

Fishing vessel owners physically mark vessel with identification numbers in three locations per vessel.

## III. Data

*OMB Control Number:* 0648-0355.

*Form Number:* None.

*Type of Review:* Regular submission (extension of a currently approved information collection).

*Affected Public:* Business or other for-profit organizations.

*Estimated Number of Respondents:* 1,693.

*Estimated Time per Response:* 45 minutes (15 minutes per marking).

*Estimated Total Annual Burden Hours:* 1,247.

*Estimated Total Annual Cost to Public:* \$66,520 in recordkeeping/reporting costs.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques

or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 16, 2011.

##### Correction

In notice document 2011-21001 appearing on page 51002 in the issue of August 17, 2011, make the following correction:

On page 51002, in the second column, under the **DATES** heading, in the third line, "August 17, 2011" should read "September 16, 2011".

#### Endangered and Threatened Species; Recovery Plans

**AGENCY:** National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

**ACTION:** Notice of Availability.

**SUMMARY:** The National Marine Fisheries Service (NMFS) announces the adoption of an Endangered Species Act (ESA) recovery plan for the Upper Willamette Chinook salmon (*Oncorhynchus tshawytscha*) Evolutionarily Significant Unit (ESU) and the Upper Willamette River steelhead (*Oncorhynchus mykiss*) Distinct Population Segment (DPS), which spawn and rear in tributaries to the Willamette River in western Oregon. The Final Upper Willamette River Conservation and Recovery Plan for Chinook Salmon and Steelhead (Final Recovery Plan) and our summary of and

responses to public comments are now available.

**ADDRESSES:** Electronic copies of the Final Recovery Plan and a summary of and response to public comments on the Proposed Recovery Plan (Proposed Plan) are available online at <http://www.nwr.noaa.gov/Salmon-Recovery-Planning/Recovery-Domains/Willamette-Lower-Columbia/Index.cfm>. A CD-ROM of these documents can be obtained by emailing a request to [rob.walton@noaa.gov](mailto:rob.walton@noaa.gov) or by writing to NMFS Protected Resources Division, 1201 NE., Lloyd Blvd., Portland, OR 97202.

**FOR FURTHER INFORMATION CONTACT:** Rob Walton, National Marine Fisheries Service, (503) 231-2285.

**SUPPLEMENTARY INFORMATION:**

**Background**

The Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*) requires that we develop and implement recovery plans for the conservation and survival of threatened and endangered species under our jurisdiction, unless it is determined that such plans would not result in the conservation of the species. We designated Upper Willamette Chinook salmon as threatened on in the **Federal Register** on June 28, 2005 (70 FR 37160) and steelhead as threatened on January 5, 2006 (71 FR 834).

We published a Notice of Availability of the Proposed Plan in the **Federal Register** on October 22, 2010 (75 FR 65299) and held four public meetings to obtain comments on the Proposed Plan. We received over 30 comments on the Proposed Plan and summarized the public comments, prepared responses, and identified the public comments that prompted revisions for the Final Recovery Plan. We revised the Proposed Plan based on the comments received, and this final version now constitutes the Upper Willamette River Conservation and Recovery Plan for Chinook Salmon and Steelhead.

**The Final Recovery Plan**

The ESA requires that recovery plans incorporate, to the extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the plan's goals; and (3) estimates of the time required and costs to implement recovery actions. Our goal is to restore the threatened Upper Willamette Chinook salmon and steelhead to the point where they are again secure, self-sustaining

members of their ecosystems and no longer need the protections of the ESA.

The Final Recovery Plan provides background on the natural history of Upper Willamette Chinook salmon and steelhead, population trends and the potential threats to their viability. The Final Recovery Plan lays out a recovery strategy to address the potential threats based on the best available science and includes goals that incorporate objective, measurable criteria which, when met, would result in a determination that the species be removed from the list. The Final Recovery Plan is not regulatory, but presents guidance for use by agencies and interested parties to assist in the recovery of Upper Willamette salmon and steelhead. The Final Recovery Plan identifies substantive actions needed to achieve recovery by addressing the threats to the species. The strategy for recovery includes a linkage between management actions and an active research and monitoring program intended to fill data gaps and assess effectiveness. The Final Recovery Plan incorporates an adaptive management framework by which management actions and other elements will evolve and adapt as we gain information through research and monitoring and it describes the agency guidance on time lines for reviews of the status of species and recovery plans. To address threats related to the species, the Final Recovery Plan references many of the significant efforts already underway to restore salmon and steelhead access to high quality habitat and to improve habitat previously degraded.

We expect the Final Recovery Plan to help us and other Federal agencies take a consistent approach to section 7 consultations under the ESA and to other ESA decisions. For example, the Final Recovery Plan will provide information on the biological context for the effects that a proposed action may have on the listed ESU and DPS. The best available information in the Final Recovery Plan on the natural history, threats, and potential limiting factors, and priorities for recovery can be used to help assess risks. Consistent with the adoption of this Final Recovery Plan for Upper Willamette salmon and steelhead, we will implement relevant actions for which we have authority, work cooperatively on implementation of other actions, and encourage other Federal and state agencies to implement recovery actions for which they have responsibility and authority.

Recovery of Upper Willamette salmon and steelhead will require a long-term effort in cooperation and coordination with Federal, state, tribal and local

government agencies, and the community.

**Conclusion**

NMFS has reviewed the Plan for compliance with the requirements of the ESA section 4(f), determined that it does incorporate the required elements and is therefore adopting it as the Final Recovery Plan for Upper Willamette salmon and steelhead.

**Authority:** 16 U.S.C. 1531 *et seq.*

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**U.S. Coral Reef Task Force Public Meeting and Public Comment**

**AGENCY:** National Ocean Service, NOAA, Department of Commerce.

**ACTION:** Notice of public meeting, Notice of public comment.

**SUMMARY:** Notice is hereby given of a public meeting of the U.S. Coral Reef Task Force. The meeting will be held in Ft. Lauderdale, Florida. This meeting, the 26th bi-annual meeting of the U.S. Coral Reef Task Force, provides a forum for coordinated planning and action among federal agencies, state and territorial governments, and nongovernmental partners. Please register in advance by visiting the Web site listed below. This meeting has time allotted for public comment. All public comment must be submitted in written format. A written summary of the meeting will be posted on the Web site within two months of its occurrence.

**DATES:** The meeting will be held Friday, October 21, 2011. Additional workshops will be held in advance of the meeting on Tuesday, October 18, and Wednesday, October 19, and field trips on Thursday, October 20. Registration is requested for all events associated with the meeting. Advance public comments can be submitted to the email, fax, or mailing address listed below from Monday, September 26–Friday, October 7.

*Location:* The meeting will be held at the Marriott Harbor Beach Hotel, 3030 Holiday Drive, Ft. Lauderdale, Florida 33316.
