BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP11-128-000; Docket No. CP11-133-000]

National Fuel Gas Supply Corporation; Tennessee Gas Pipeline Company; Notice of Availability of the Environmental Assessment for the Proposed Northern Access and Station 230C Projects

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for National Fuel Gas Supply Corporation's (National Fuel) proposed Northern Access Project and Tennessee Gas Pipeline Company's (TGP) proposed Station 230C Project in the above referenced dockets. National Fuel and TGP request authorization to construct facilities in Pennsylvania and New York to provide an additional 320,000 dekatherms per day of natural gas to TransCanada Corporation. Because both

companies would construct their respective proposed facilities to provide these additional volumes, we analyzed them jointly in one EA.

The EA assesses the potential environmental effects of the construction and operation of National Fuel's and TGP's proposed projects in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed projects, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

National Fuel's project includes the following facilities:

- A new East Aurora Compressor Station, totaling 4,470-horsepower (hp), and auxiliary facilities in Erie County, New York;
- Piping modifications at the existing Concord Compressor Station in Erie County, to permit bi-directional flow;
- Modifications to underground piping and valves at the existing East Eden Metering and Regulation facility in Erie County;
- Expansion of the Ellisburg Compressor Station with two new compressor units, totaling 9,470-hp, on an adjacent lot in Potter County, Pennsylvania; and
- A new Rose Lake Meter Station and auxiliary piping/facilities at the Ellisburg Compressor Station.

TGP's project consists of the following facility modifications at its existing Station 230C Compressor Station in Niagara County, New York:

- New Solar Centaur natural gas-fired turbines for compressor units A2 and A3 and restaging of centrifugal compressors for units A2, A3, and A4 for bi-directional flow;
- New station cooling equipment and discharge flow check meters and check valves along the existing 20- and 30-inch Niagara Spur Loop Line pipelines; and
- Modification to station piping and automation systems, and installation of yard valves to allow bi-directional flow.

The EA has been placed in the public files of the FERC and is available for public viewing on the FERC's Web site at <http://www.ferc.gov> using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Copies of the EA have been mailed to federal, state, and local government representatives and agencies; elected officials; environmental and public

interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding.

Any person wishing to comment on the EA may do so. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that your comments are properly recorded and considered prior to a Commission decision on the proposal, it is important that the FERC receives your comments in Washington, DC on or before September 16, 2011.

For your convenience, there are three methods you can use to submit your comments to the Commission. In all instances, please reference the project docket number (CP11-128-000 or CP11-133-000) with your submission. The Commission encourages electronic filing of comments and has dedicated eFiling expert staff available to assist you at (202) 502-8258 or efiling@ferc.gov.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's Web site at <http://www.ferc.gov> under the link to Documents and Filings. An eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments electronically by using the eFiling feature, which is located on the Commission's Web site at <http://www.ferc.gov> under the link to Documents and Filings. With eFiling you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making. A comment on a particular project is considered a "Comment on a Filing"; or

(3) You may file a paper copy of your comments at the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Room 1A, Washington, DC 20426.

Although your comments will be considered by the Commission, simply filing comments will not serve to make the commentor a party to the proceeding. Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR

385.214).¹ Only intervenors have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your comments considered.

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208-FERC or on the FERC Web site (<http://www.ferc.gov>) using the eLibrary link. Click on the eLibrary link, click on "General Search" and enter the docket number excluding the last three digits in the Docket Number field (*i.e.*, CP11-128 or CP11-133). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents.
