SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC–588, “Emergency Natural Gas Transportation, Sale and Exchange Transactions” (OMB No. 1902–0144), is used by the Commission to implement the statutory provisions of Sections 7(c) of the Natural Gas Act (NGA) (Pub. L. 75–688) (15 USC 717–717w) and provisions of the Natural Gas Policy Act of 1978 (NGPA), 15 USC 3301–3432. Under the NGA, a natural gas company must obtain Commission approval to engage in the transportation, sale or exchange of natural gas in interstate commerce. However, Section 7(c) exempts from certificate requirements “temporary acts or operations for which the issuance of a certificate will not be required in the public interest.” The NGPA also provides for non-certificated interstate transactions involving intrastate pipelines and local distribution companies.

A temporary operation, or emergency, is defined as any situation in which an actual or expected shortage of gas supply would require an interstate pipeline company, intrastate pipeline, or local distribution company, or Hinshaw pipeline to curtail deliveries of gas or provide less than the projected level of service to the customer. The natural gas companies which provide the temporary assistance to the companies which are having the “emergency” must file the necessary information described in Part 284, Subpart I of the Commission’s Regulations with the Commission so that it may determine if their assisting transaction/operation qualifies for exemption. The assisting company may or may not be under the Commission’s jurisdiction and if their assisting actions qualify for the exemption, they will not become subject to the Commission’s jurisdiction for such actions.

A report within forty-eight hours of the commencement of the transportation, sale or exchange, a request to extend the sixty-day term of the emergency transportation, if needed, and a termination report are required. The data required to be filed for the forty-eight hour report is specified by 18 CFR 284.270.

Action: The Commission is requesting a three-year approval of the collection of data. This is a mandatory information collection requirement.

Burden Statement: Public reporting burden for this collection is estimated as follows:

<table>
<thead>
<tr>
<th>Number of respondents annually (1)</th>
<th>Number of responses per respondent (2)</th>
<th>Average burden hours per response (3)</th>
<th>Total annual burden hours (1) × (2) × (3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td>1</td>
<td>8</td>
<td>64</td>
</tr>
</tbody>
</table>

The estimated total cost to respondents is $4,381 (64 hours divided by 2,080 hours per employee per year times $142,372 per year average salary per employee = $4,381 (rounded)). The estimated annual cost per respondent is $548 (rounded).

The above hour and cost estimates are different than what was in the public notice published May 27, 2011. In that notice, the Commission erroneously used an average burden hours per response of 10 hours instead of 8 hours that is used here. By using the correct burden hour figure, the Commission notes that total annual burden and cost are less by 16 hours less and $1,095 as compared to the numbers in the May, 2011 notice. The corrected estimates are consistent with the burden estimates in the last submission to OMB.
The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology e.g. permitting electronic submission of responses.

Dated: August 16, 2011.

Kimberly D. Bose,
Secretary.

In addition, section 3401 of the Omnibus Budget Reconciliation Act of 1986 (OBRA) authorizes the Commission to “assess and collect fees and annual charges in any fiscal year in amounts equal to all of the costs incurred by the Commission in that fiscal year.” The information is collected annually and used to determine the amounts of the annual charges to be assessed licensees for reimbursable government administrative costs and for the use of government dams.
