

survey, 5 minutes; follow-up telephone call, 2 minutes; biological survey, 1 minute; headboat survey, 4 minutes.

Burden Hours: 2,451.

Needs and Uses: This request is for a revision and extension of a current information collection.

The Large Pelagic Fishing Survey consists of dockside and telephone surveys of recreational anglers for large pelagic fish (tunas, sharks, and billfish) in the Atlantic Ocean. The survey provides the National Marine Fisheries Service (NMFS) with information to monitor catch of bluefin tuna, marlin and other federally-managed species. Catch monitoring in these fisheries and collection of catch and effort statistics for all pelagic fish is required under the Atlantic Tunas Convention Act and the Magnuson-Stevens Fishery Conservation and Management Act. The information collected is essential for the United States (U.S.) to meet its reporting obligations to the International Commission for the Conservation of Atlantic Tuna. The revision is due to the elimination of two surveys from the collection.

Affected Public: Individuals or households.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Number of Respondents: 163.

The annual reports submitted by grantees are the only complete source of compiled information on FTZs. The data and information contained in the reports relates to international trade activity in FTZs. The reports are used by the Congress and the Department to determine the economic effect of the FTZ program. The public uses the information regarding FTZs activities to evaluate their effect on industry sectors. The information contained in annual reports also helps zone grantees in their marketing efforts.
