Notice of Availability of the Record of Decision on the Final Programmatic Environmental Impact Statement for the Mechanical and Artificial Creation and Maintenance of Emergent Sandbar Habitat in the Riverine Segments of the Upper Missouri River, Missouri River Basin, United States

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of availability.

SUMMARY: The District Commander of the Omaha District U.S. Army Corps of Engineers ( Corps) has reviewed the “Final Programmatic Environmental Impact Statement (PEIS) for the Mechanical and Artificial Creation and Maintenance of Emergent Sandbar Habitat (ESH) on the Riverine Segments of the Upper Missouri River” and has made the decision to proceed with the implementation of an Adaptive Management Implementation Process (AMIP) (preferred alternative) with a construction ceiling of acres associated with Alternative 3.5. Specific details of the decision are captured in the Record of Decision (ROD) for this action. The ROD explains that the Corps will create and maintain ESH acres in the Fort Peck, Garrison, Fort Randall and Gavins Point River Segments, and the Lewis and Clark River Segment for the benefit of the Interior Population of the least tern (least tern) and the northern Great Plains piping plover (piping plover). The maximum potential acres of ESH to be created is approximately 4,370 acres total, with the following estimated maximum acres by reach:

• Fort Peck River, 565.
• Garrison River, 1,327.
• Fort Randall River, 212.
• Lewis & Clark Lake, 354.
• Gavins Point River, 1,073.

The AMIP alternative best supports the needs of the birds while providing flexibility in program implementation that will help minimize environmental impacts as well as costs.

ADDRESSES: Questions or comments on the ROD should be sent to: Department of the Army; Corps of Engineers, Omaha District; CENWO–PM–AC; ATTN: Emergent Sandbar Habitat Programmatic EIS; 1616 Capitol Avenue; Omaha, NE 68102–4901, or e-mailed to: Cynthia.s.upah@usace.army.mil.

SUPPLEMENTARY INFORMATION:

1. Background. The ESH program resulted from a Biological Opinion (BiOp) issued by the U.S. Fish and Wildlife Service (USFWS) in which the Reasonable and Prudent Alternative (RPA) IV(b)3 called for the Corps to provide sufficient ESH acreage in order to meet biological metrics (fledge ratios) to avoid jeopardizing continued existence of the least tern and piping plover, as defined by the Endangered Species Act (ESA). The Final PEIS provides National Environmental Policy
