SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Federal Emergency Management Agency (FEMA) proposes to update and reissue a current DHS/FEMA system of records titled, "DHS/FEMA-001 National

Emergency Family Registry and Locator (NEFRLS) System of Records," 74 FR 48767, September 29, 2009.

The DHS/FEMA NEFRLS System of Records collects information from Law Enforcement Officials (LEOs) for the purpose of responding to a Missing Persons Report. The information collected from LEOs is to facilitate identity verification and their status as a member of law enforcement.

During Hurricane Katrina, displaced individuals experienced numerous difficulties in reuniting with family members after the disaster. As a result, Congress mandated in Section 689c of the Post-Katrina Emergency Management Reform Act (PKEMRA) of 2006, Public Law 109-295, that FEMA establish NEFRLS. FEMA has the discretionary authority to activate NEFRLS to help reunify families separated after an emergency or disaster declared by the President as defined in the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207.

The collection of a LEO's identifying information increased the amount of identifying information collected and maintained by the DHS/FEMA-001 NEFRLS System of Records. Information collected is stored on FEMA secured servers, and/or stored in locked cabinets with secured facility access controls.

Previously, the DHS/FEMA-001 NEFRLS System of Records only allowed two groups of individuals limited access. The groups were: (1) Registrants: displaced individuals registered in the system; and (2) searchers: individuals who are searching for family or household members who registered in the system. The DHS/FEMA-001 NEFRLS System of Records now allows FEMA NEFRLS Administrators to have limited access to records for the purpose of sharing registrants' information with LEOs pursuant to an official missing persons report. This increases the likelihood of reunifying family and friends displaced by a Presidentially-declared emergency or disaster.

The following categories are being updated: Categories of individuals is updated to clarify and specifically include LEOs; Categories of Records is updated to include LEO identifying information (such as Badge Number) and LEO verification indicators; Routine Uses is updated to clearly identify sharing with Federal, state, local, tribal, territorial, international, or foreign LEOs; and Records Source Categories is updated to include LEOs as a source.

This updated system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which the U.S. Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors.

Below is the description of the DHS/FEMA-001 NEFRLS System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Office of Health Affairs (OHA) proposes to establish a new DHS system of records titled, "DHS/ALL-034 Emergency Care Medical Records."

The Assistant Secretary for Health Affairs and Chief Medical Officer (ASHA/CMO) exercises oversight over all medical and public health activities of DHS, with the exception of U.S. Coast Guard (USCG) medical and public health activities. Throughout its components, the DHS workforce includes approximately 3,500 Emergency Medical Service (EMS) healthcare providers rendering emergency medical care in the pre-hospital environment, primarily to DHS employees and, when necessary, to individuals encountered in the course of duty in need of emergency care. These DHS EMS healthcare providers are employed by the following DHS components: U.S. Customs and Border Protection (CBP), U.S. Immigration and Customs Enforcement (ICE), the United States Secret Service (USSS), Transportation Security Administration (TSA), U.S. Citizenship and Immigration Services (USCIS), Federal Law Enforcement Training Center (FLETC), Federal Emergency Management Agency (FEMA), and Science & Technology Directorate (S&T).

OHA administers oversight of DHS EMS healthcare providers through its Medical Quality Management (MQM) program, to ensure DHS EMS providers deliver consistent, quality medical care. To support MQM, OHA operates the electronic Patient Care Record (ePCR), an electronic encounter-based database designed for EMS management. After administering emergency care, DHS
